1) Introduction

This document is the User Guide for Magento 2 Ajax Cart Pro. It describes the extension functionality and provides some tips for a quick start.

Rescue cart abandonment - Bring the power of AJAX to your Magento 2 checkout.

Installing a [Magento 2 AJAX Cart Pro](#) extension to your site can make a world of difference in customers shopping journey. This kind of extensions allows customers to continue shopping without waiting for pages to reload each time adding items to cart or removing items from the cart.

- Make orders quickly and directly without page redirecting via popup
- Easily customize popup
- Additional advertising - Suggest related products for cross-selling and up-sell purposes
- Support all types of products
- Display all necessary information in the popup
- Fully Responsive
- Set countdown time to make the process even faster

II) General Settings

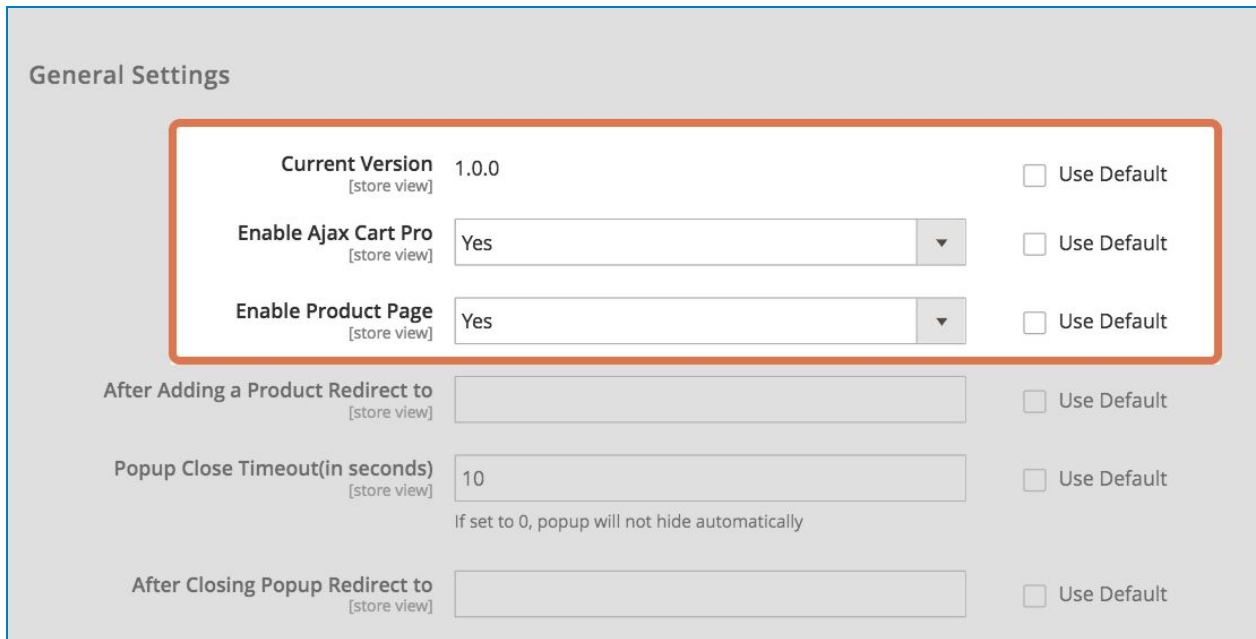

To configure settings for this extension, administrators can log into back-end and navigate to **Stores > Configuration > Ajax Cart**. Set the **Store View** at **Default Config** -> The General Settings will be displayed immediately like:

Current Version <small>[store view]</small>	1.0.0
Enable Ajax Cart Pro <small>[store view]</small>	<input type="text" value="Yes"/>
Enable Product Page <small>[store view]</small>	<input type="text" value="Yes"/>
After Adding a Product Redirect to <small>[store view]</small>	<input type="text"/>
Popup Close Timeout(in seconds) <small>[store view]</small>	<input type="text" value="10"/>
	If set to 0, popup will not hide automatically
After Closing Popup Redirect to <small>[store view]</small>	<input type="text"/>

1. Enable Ajax

Untick all the boxes before "Use system value" first

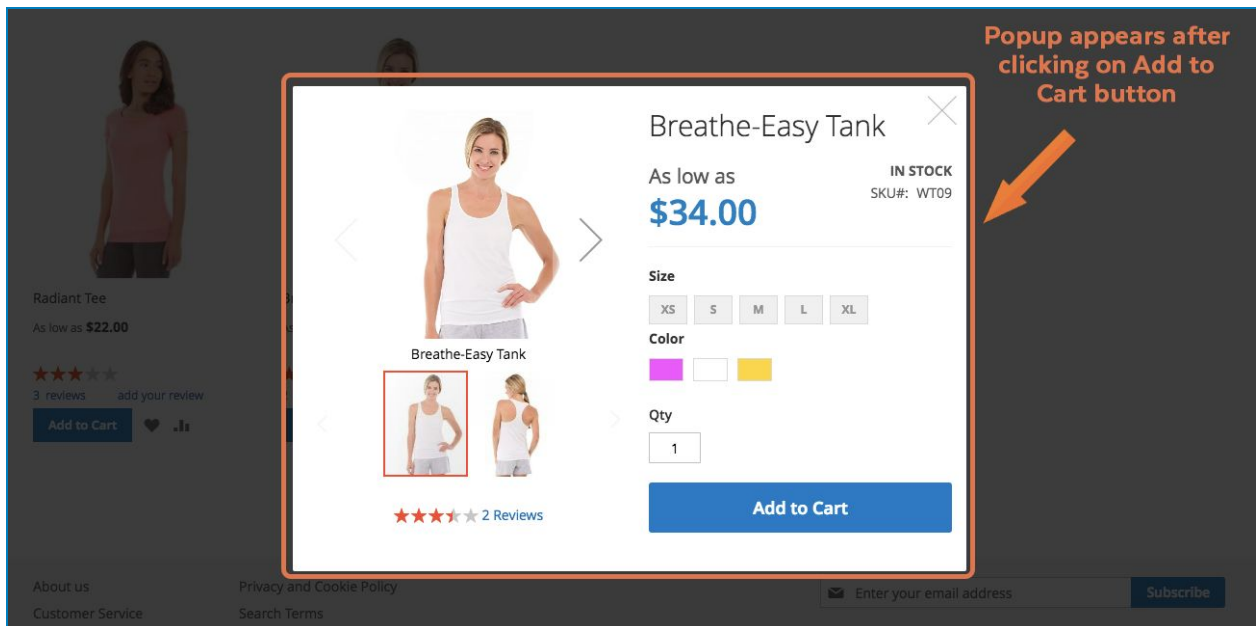

Enable Ajax Cart Pro: choose yes to allow Ajax Cart extension to run on your website

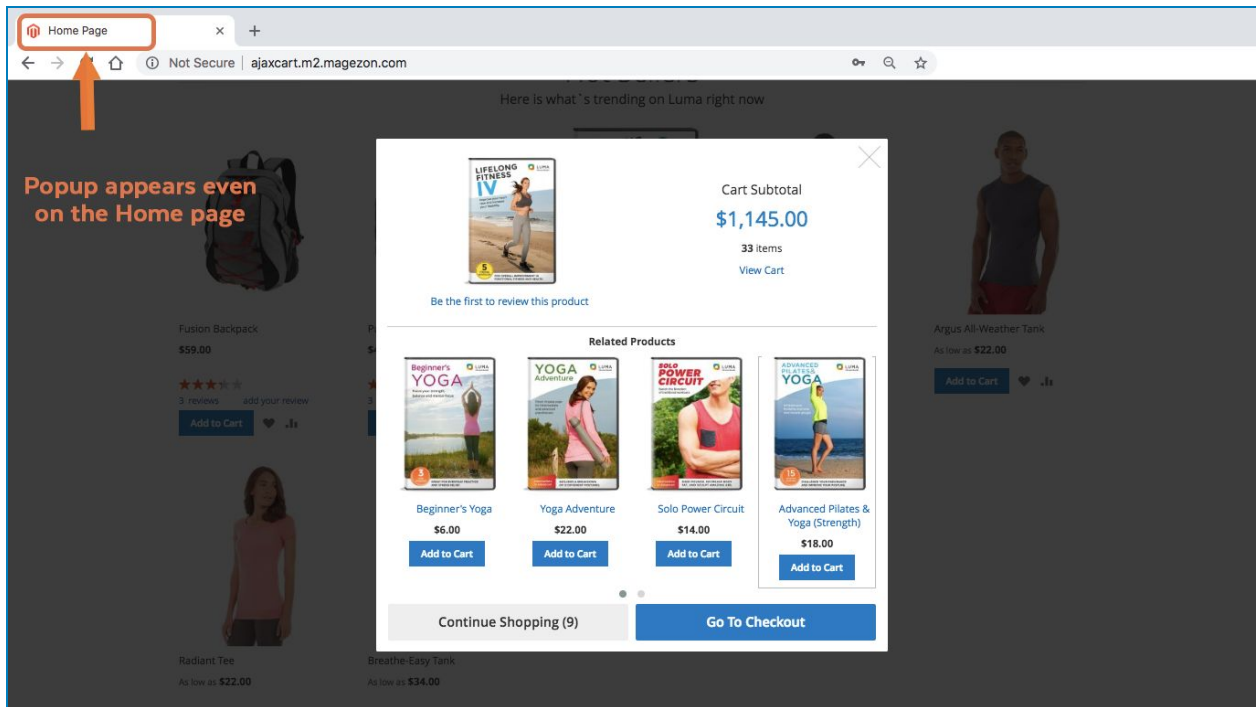

General Settings

Current Version [store view]	1.0.0	<input type="checkbox"/> Use Default
Enable Ajax Cart Pro [store view]	Yes	<input type="checkbox"/> Use Default
Enable Product Page [store view]	Yes	<input type="checkbox"/> Use Default
After Adding a Product Redirect to [store view]		<input type="checkbox"/> Use Default
Popup Close Timeout(in seconds) [store view]	10 If set to 0, popup will not hide automatically	<input type="checkbox"/> Use Default
After Closing Popup Redirect to [store view]		<input type="checkbox"/> Use Default

And you can see our extension is activated in the storefront:

And it even appears on Product Listing Page/Home Page

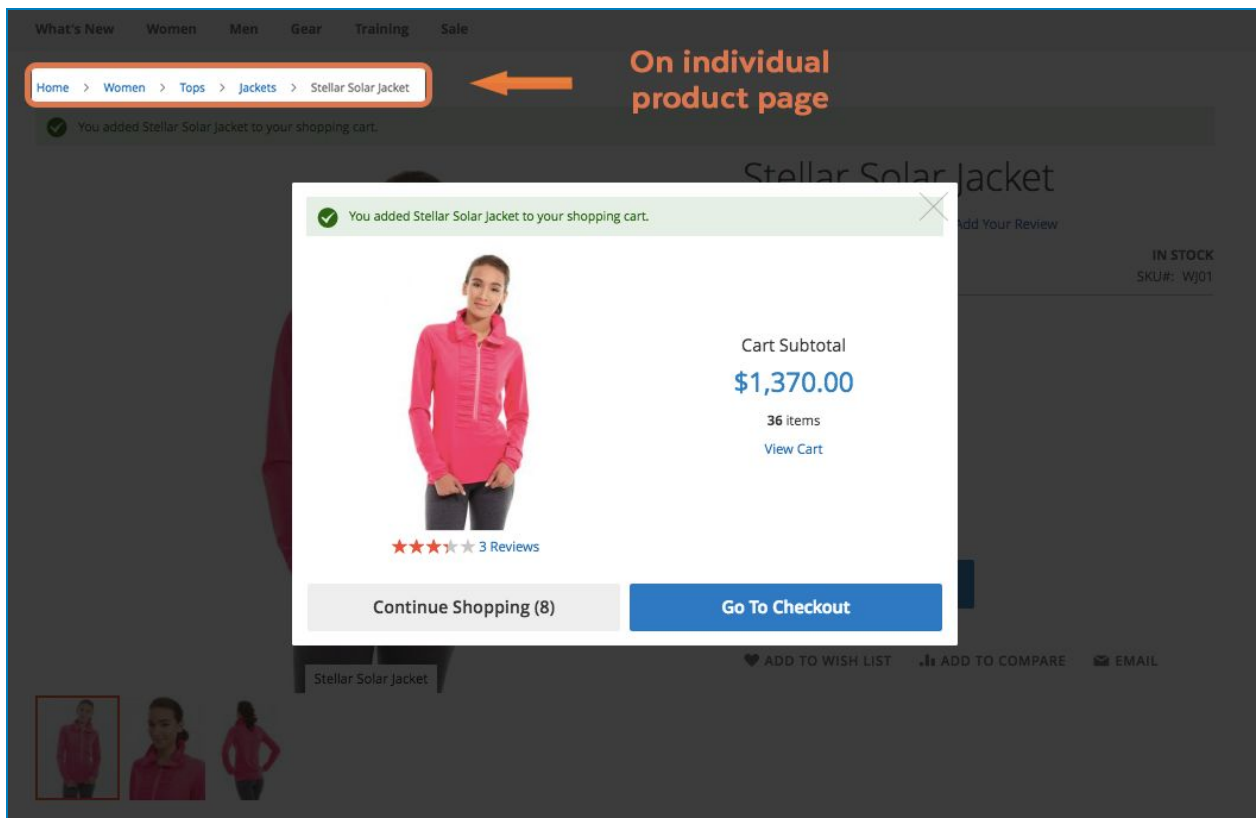

2. Enable Ajax Cart on Product Page

Enable Product Page: Choose Yes to use Ajax Cart on Product view page

Then the result on the Individual Product Page will be like:

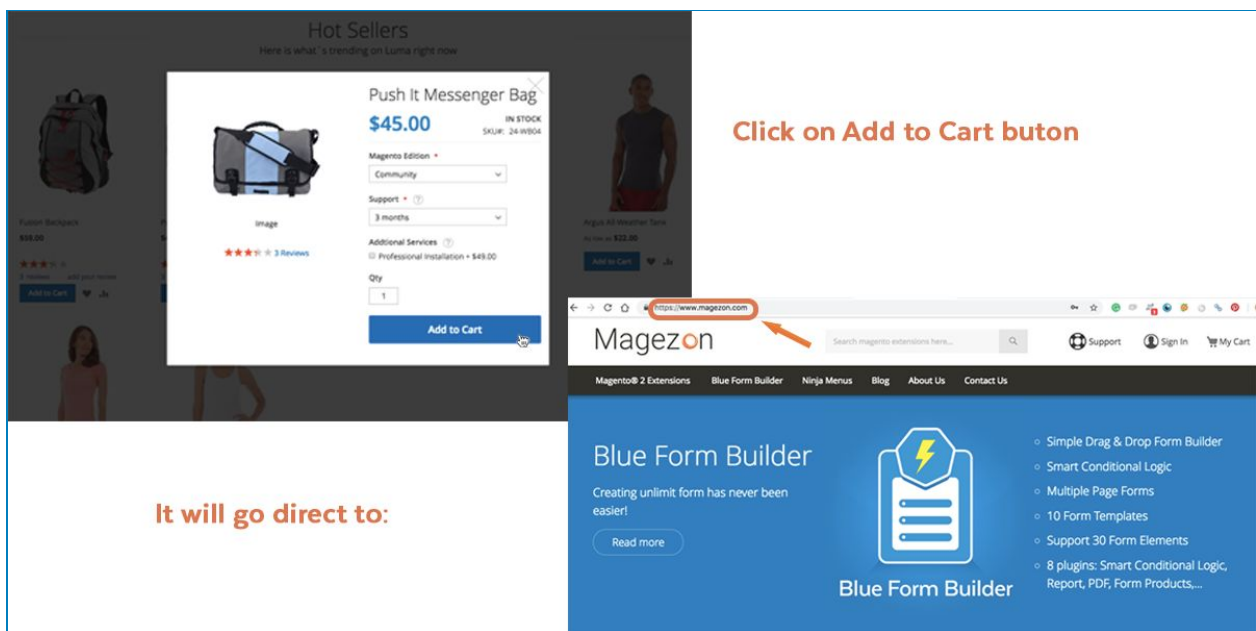

3. Link to desired page after adding item

Add your desired link into the field of **After Adding a Product Redirect to**. This case, we make it be <https://www.magezon.com>

After Adding a Product Redirect to [store view]	<input type="text" value="https://www.magezon.com"/>
---	--

And see how it work:

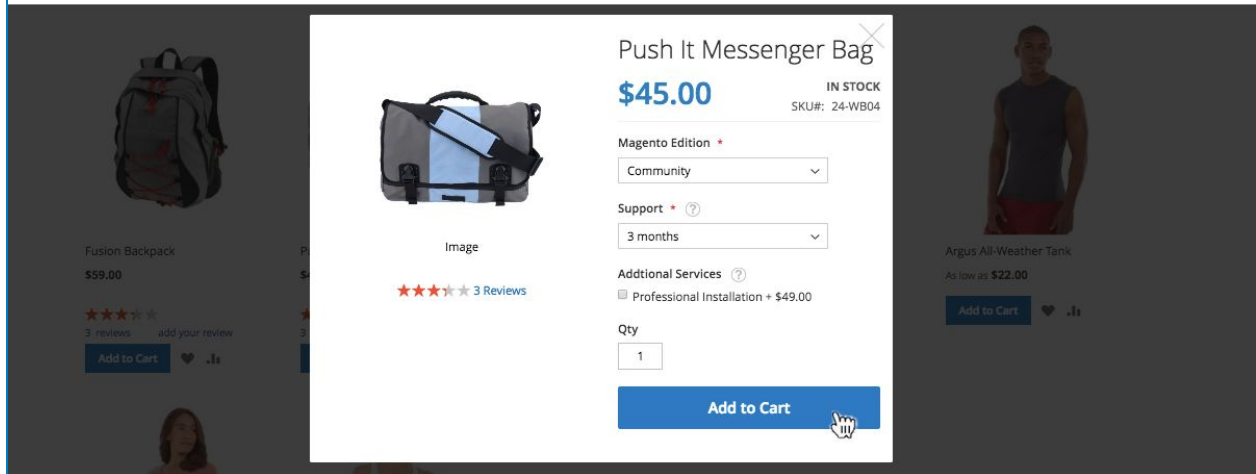

Or you just have to enter the name of the page you want to direct to. For example: Checkout page. Just enter "checkout" and let our code does the rest.

After Adding a Product Redirect to [store view]	<input type="text" value="checkout"/>
---	---------------------------------------

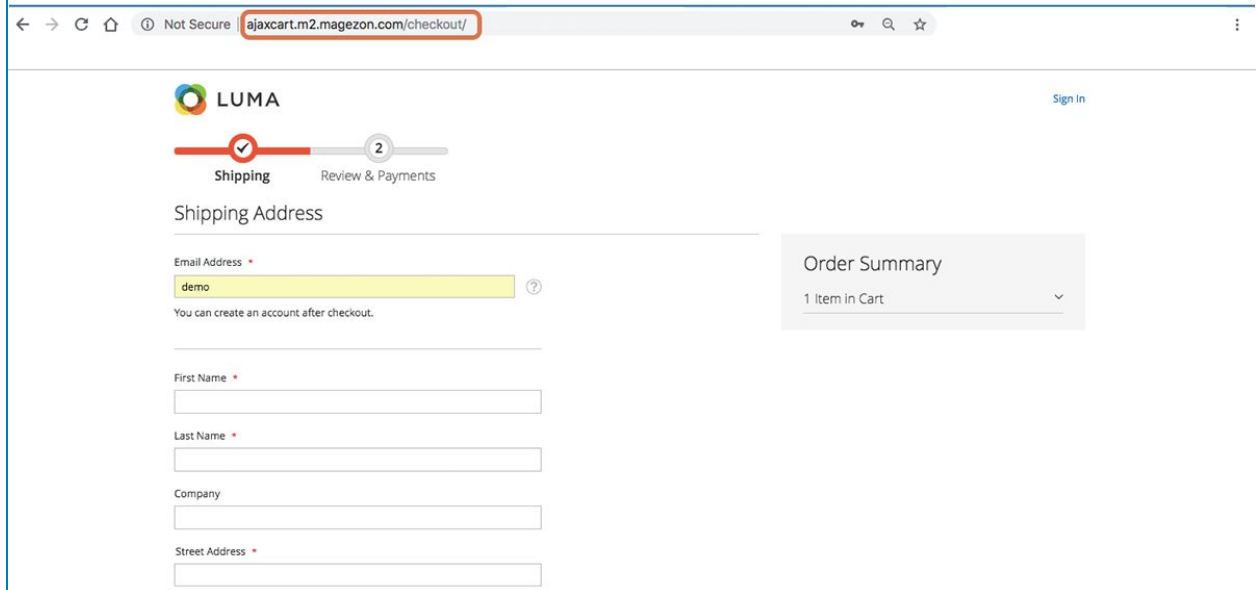

And the result:

Click on the Add to Cart button

The screenshot shows a product page for the 'Push It Messenger Bag'. The product is priced at \$45.00 and is in stock. It features a 'Community' Magento Edition, 3 months of support, and an option for professional installation for an additional \$49.00. The quantity is set to 1. A blue 'Add to Cart' button is highlighted with a mouse cursor.

And it will direct to

The screenshot shows the checkout page on 'ajaxcart.m2.magezon.com'. The page is titled 'LUMA' and has a progress bar with 'Shipping' (1) and 'Review & Payments' (2). The 'Shipping Address' section includes fields for Email Address (demo), First Name, Last Name, Company, and Street Address. An 'Order Summary' box on the right indicates '1 Item in Cart'.

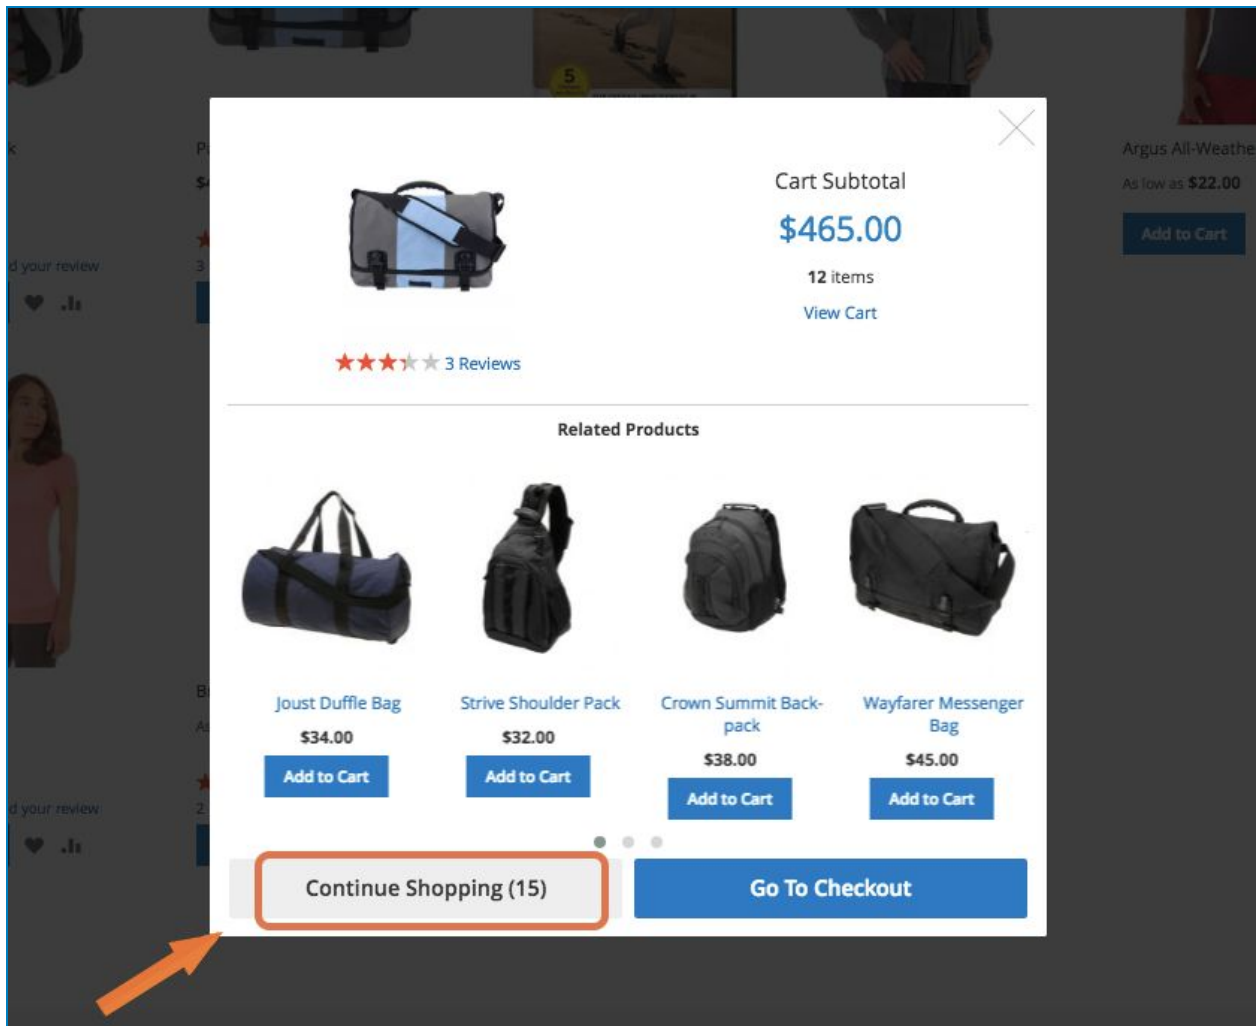

4. Set up close timeout for popup

Popup Close Timeout (in seconds): set the time you want popup to close

Let's make it 15 seconds this case:

Popup Close Timeout(in seconds) <small>[store view]</small>	<input type="text" value="15"/>
If set to 0, popup will not hide automatically	

Here, it's set:

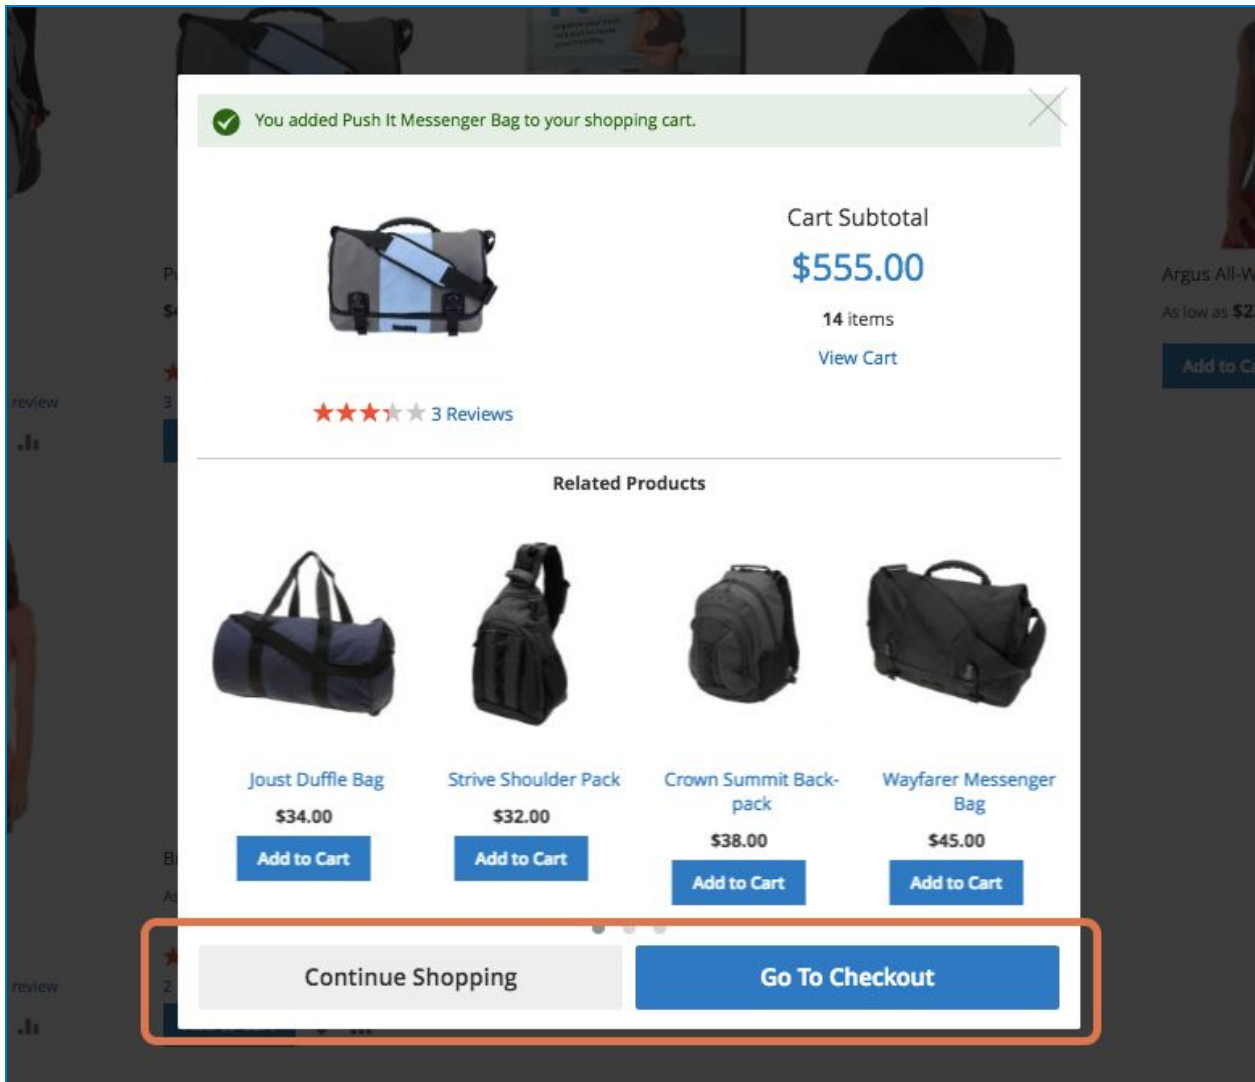

Or, if you set the time to 0:

Popup Close Timeout(in seconds) [store view]

If set to 0, popup will not hide automatically

There will be no countdown clock anymore:

✔ You added Push It Messenger Bag to your shopping cart.

Cart Subtotal

[Continue Shopping](#) [Go To Checkout](#)

5. Link to desired page after closing popup

Enter your desired page. Let's check with this one:

After Closing Popup Redirect to [store view]

And the result after clicking on "x" button will be like:

 <p>Push It Messenger Bag \$45.00 IN STOCK SKU#: 24-WB04</p> <p>Magento Edition + Community</p> <p>Support + ? 3 months</p> <p>Additional Services ? <input type="checkbox"/> Professional Installation + \$49.00</p> <p>Qty 1</p> <p>Add to Cart</p>	 <p>Lot Secure ajaxcart.m2.magezon.com</p> <p>LUMA</p> <p>What's New Women Men Gear Training Sale</p> <p>Save</p> <p>Image of a woman meditating on a beach.</p>
<p>Clicking on closing button</p>	<p>Go direct to home page</p>

III) Display Settings

Untick all the boxes before "Use system value" first

Display Close Button <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Product Image <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Enable Gallery <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Product Review <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Product Name <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Product Short Description <small>[store view]</small>	No	<input type="checkbox"/> Use system value
Display Product Price <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Product SKU <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Product Stock Status <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Total Amount in Cart <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Total Count of Products in Cart <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display 'Go to Checkout' Button <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display 'Continue Shopping' Button <small>[store view]</small>	Yes	<input type="checkbox"/> Use system value
Display Related Products <small>[store view]</small>	Related Products	<input type="checkbox"/> Use system value
Related Products Block Title <small>[store view]</small>	Related Products	<input type="checkbox"/> Use system value
Number of Products <small>[store view]</small>	10	<input type="checkbox"/> Use system value
Replace Completely with <small>[store view]</small>	None	<input type="checkbox"/> Use system value

1. Try turning on the first 5 fields

Display Close Button: Choose to show a close button on popup or not

Display Product Image: Enable/disable add a picture to describe your product

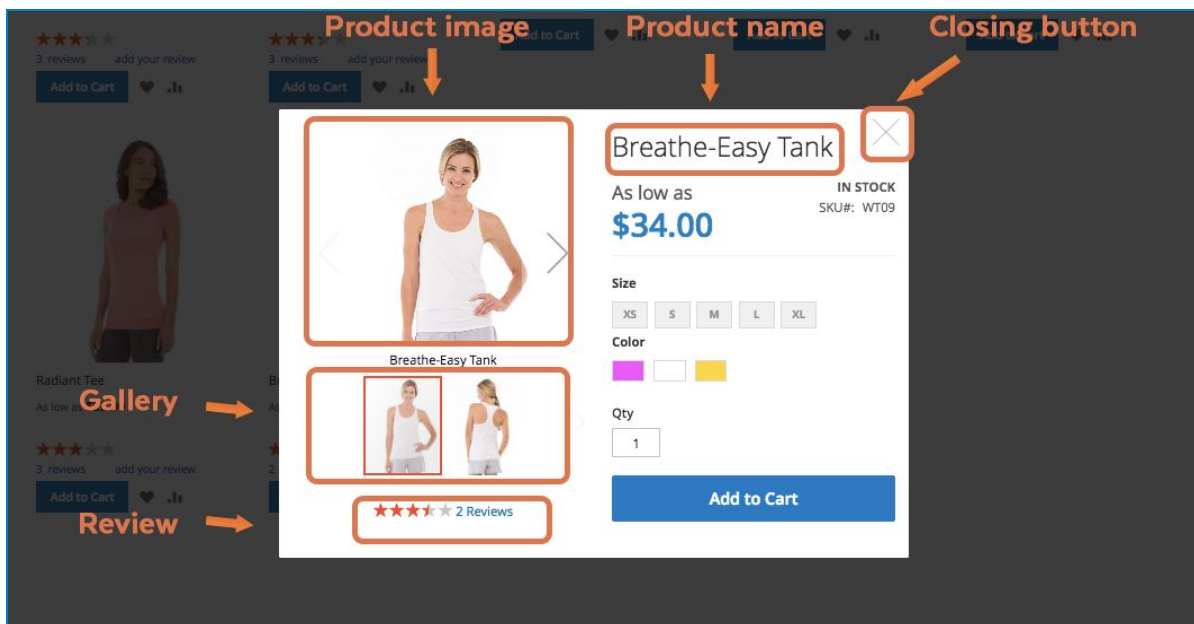

Enable Gallery: Where you store pictures related to store's product

Display Product Review: Choose yes to show product's feedback and star ratings

Display Product Name: Define if Ajax Cart should display product's name

Display Close Button <small>[store view]</small>	Yes	▼
Display Product Image <small>[store view]</small>	Yes	▼
Enable Gallery <small>[store view]</small>	Yes	▼
Display Product Review <small>[store view]</small>	Yes	▼
Display Product Name <small>[store view]</small>	Yes	▼

Then see the result:

2. The next 5 fields

Display Product Short Description: Define if Ajax Cart show products short description

Display Product Price: Show the exact price of the item

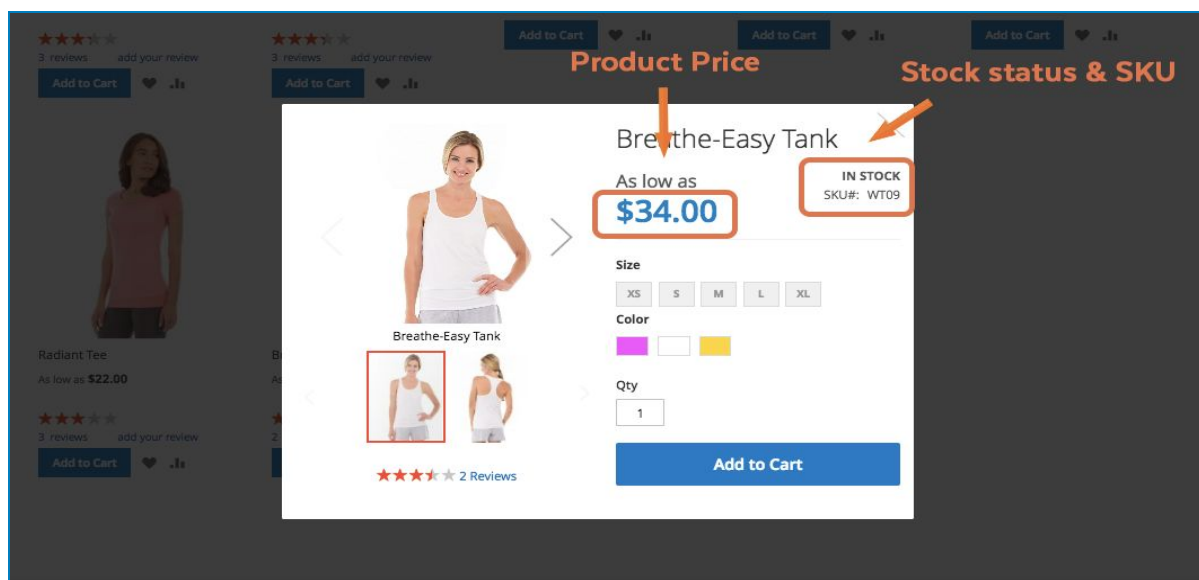

Display Product SKU: Show the **Stock Keeping Unit (SKU)** number of the item

Display Product Stock Status: Show the status of the product (In stock, out stock or pre-order...)

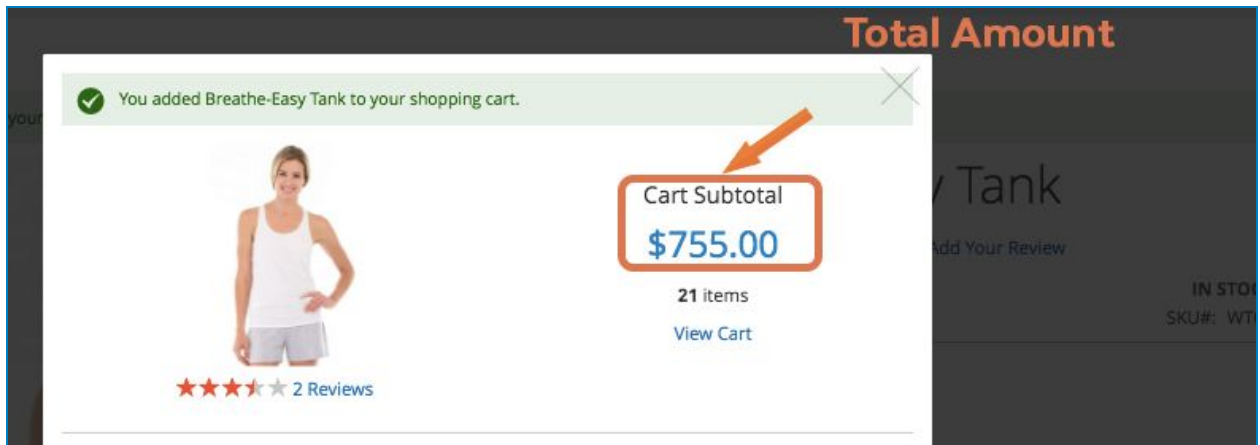

Display Total Amount in Cart: Let shopper know how many products are in the shopping cart

Display Product Short Description <small>[store view]</small>	Yes
Display Product Price <small>[store view]</small>	Yes
Display Product SKU <small>[store view]</small>	Yes
Display Product Stock Status <small>[store view]</small>	Yes
Display Total Amount in Cart <small>[store view]</small>	Yes

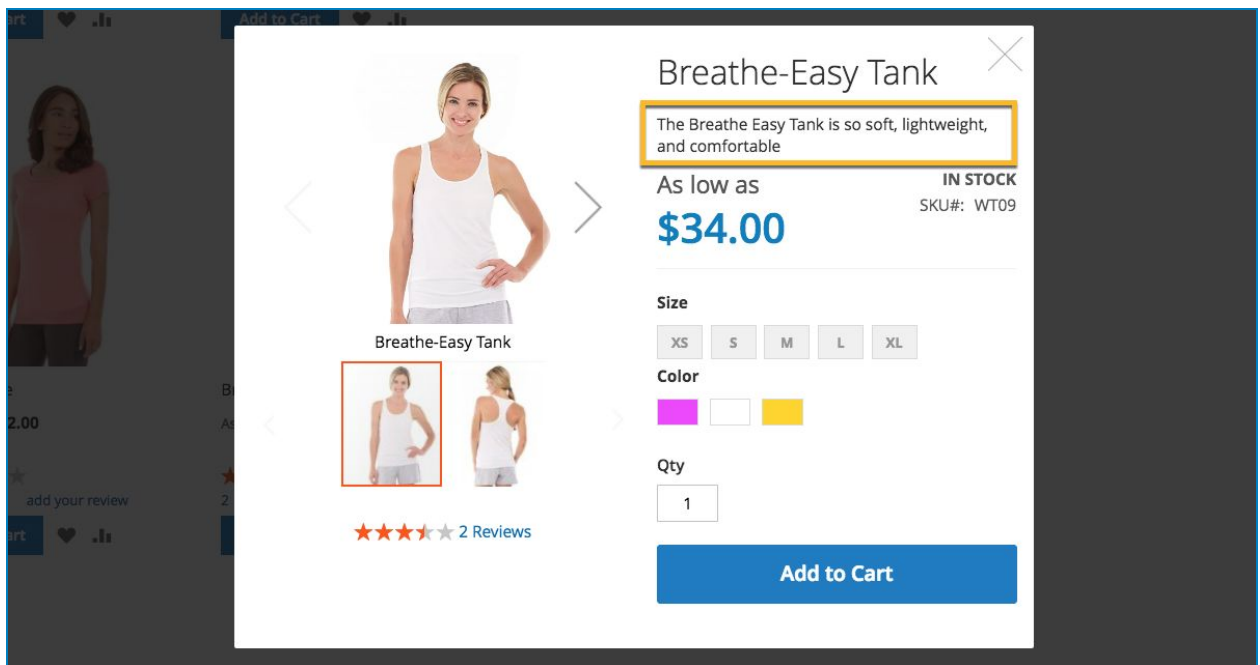

Then see how it work in the storefront:

And the Amount in Shopping Cart:

How the short description displayed

Note: Short description will only be displayed when the product is configurable type. The simple ones don't get this function, and the short description is displayed only on Product Page.

3. The next 3 fields

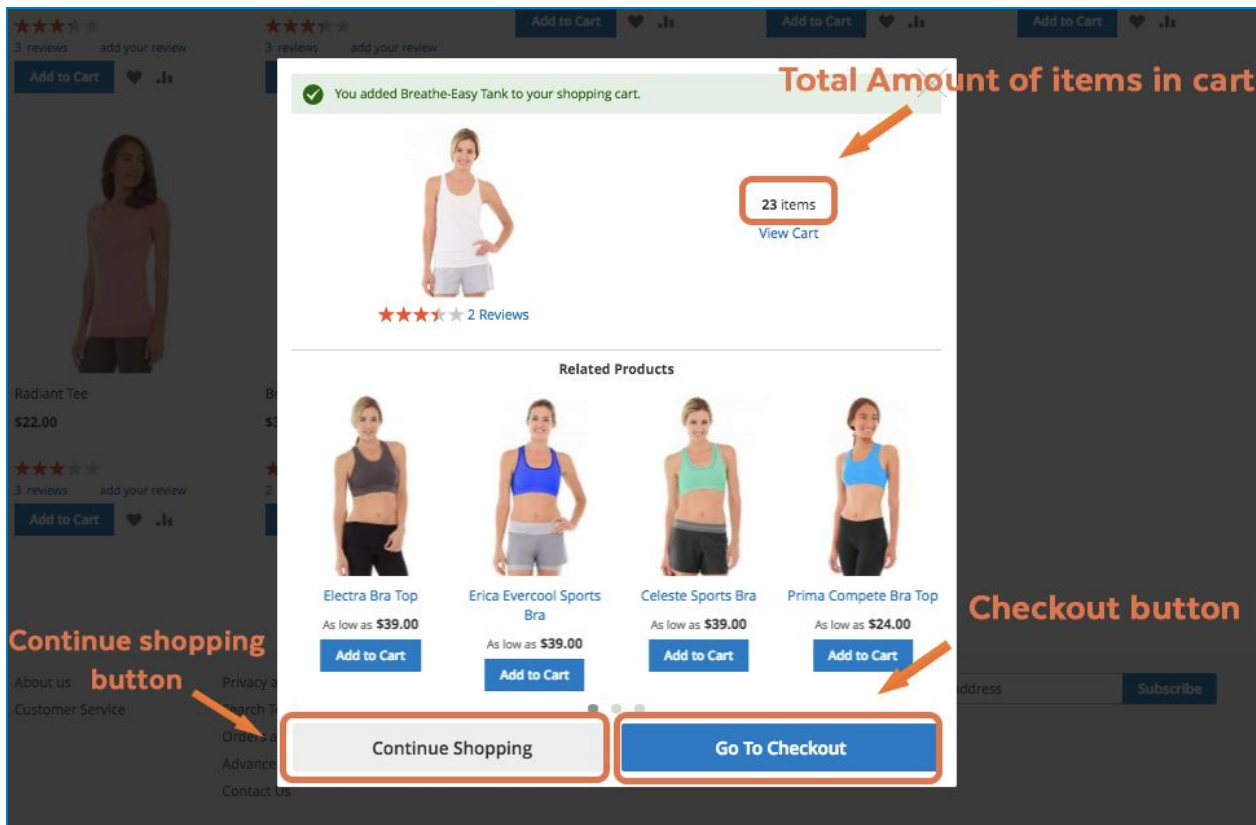

Display Total Count of Products in Cart: Show the number of items recently added

Display 'Go to Checkout' Button: Give customer a choice to check out immediately after adding any product to cart

Display 'Continue Shopping' Button: Suggest customers to keep on their shopping

Display Total Count of Products in Cart <small>[store view]</small>	Yes
Display 'Go to Checkout' Button <small>[store view]</small>	Yes
Display 'Continue Shopping' Button <small>[store view]</small>	Yes

And the result:

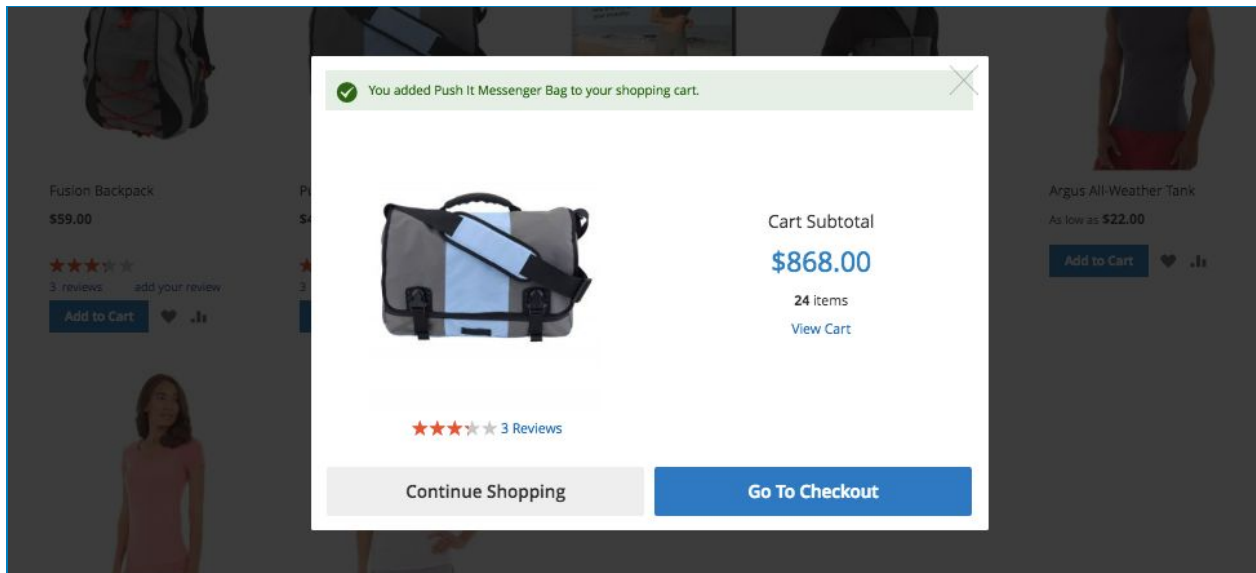

4. Display related products

This field gives you 4 options

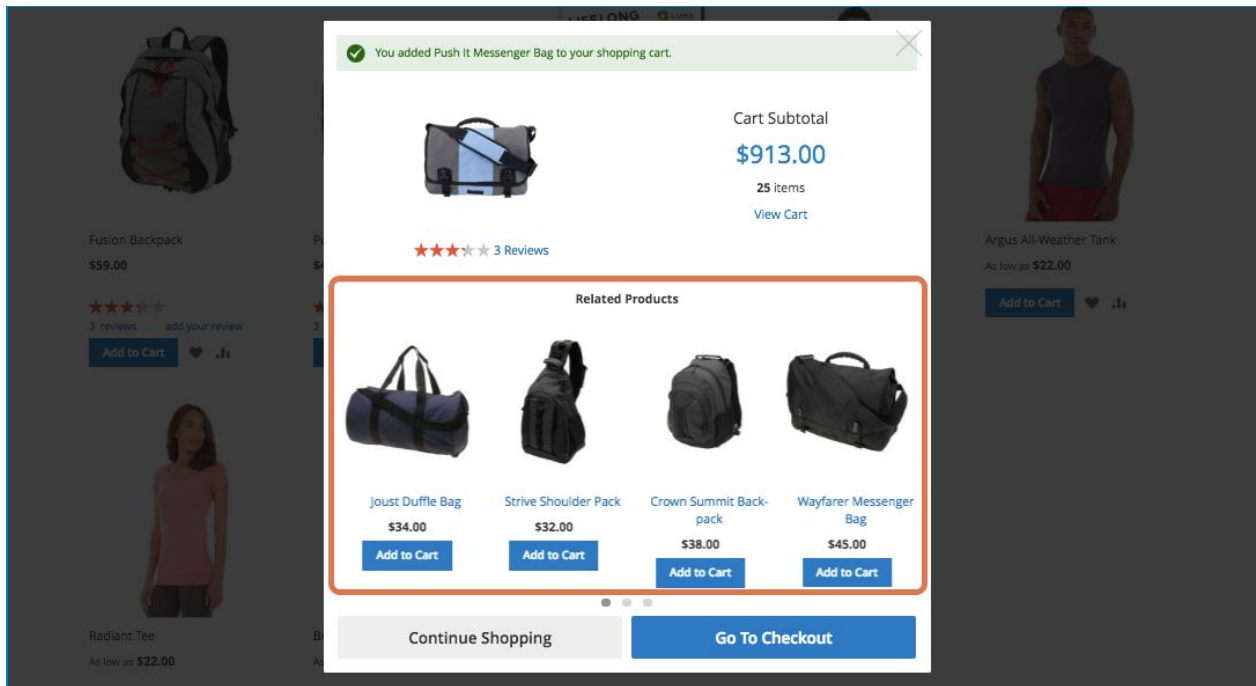

For each option, you will receive different result in storefront.

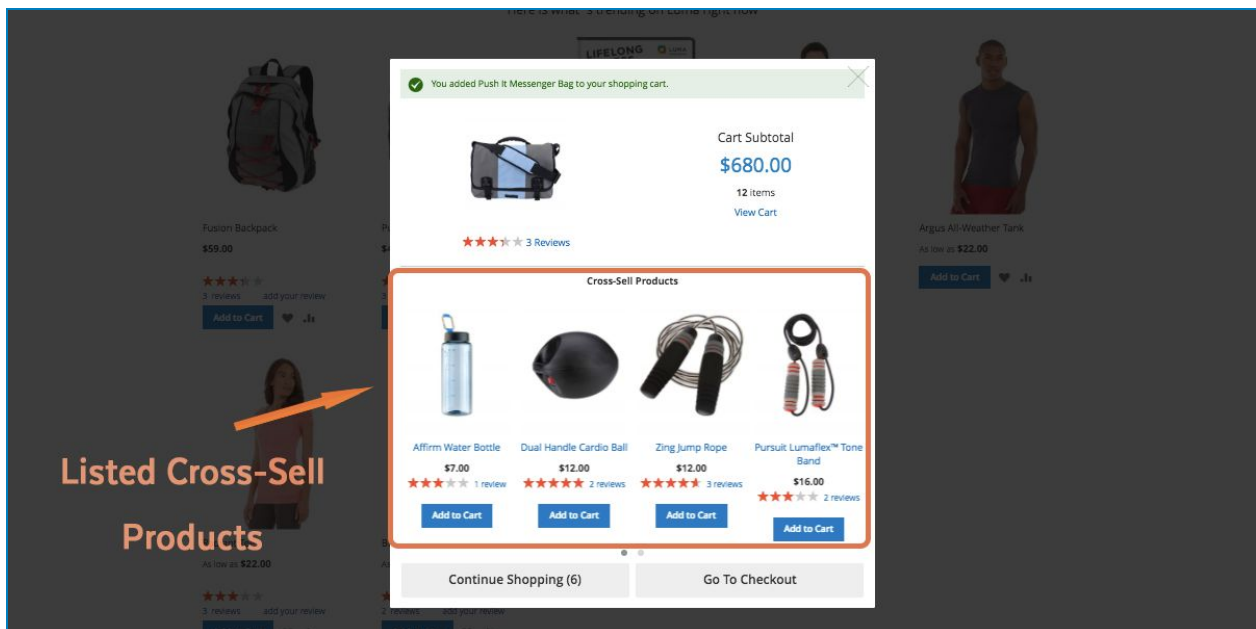

- If you choose No -> Nothing will appear underneath the product added

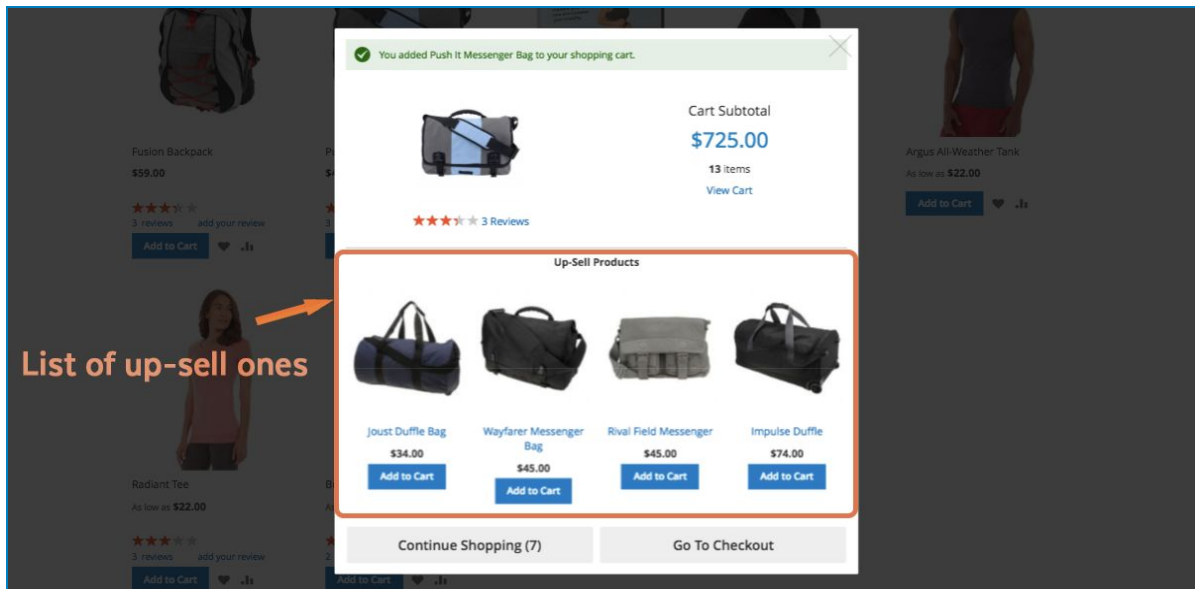

- If it is "Related products", the popup will be like:

- Or Cross-sell Products

- And the Up-sell ones

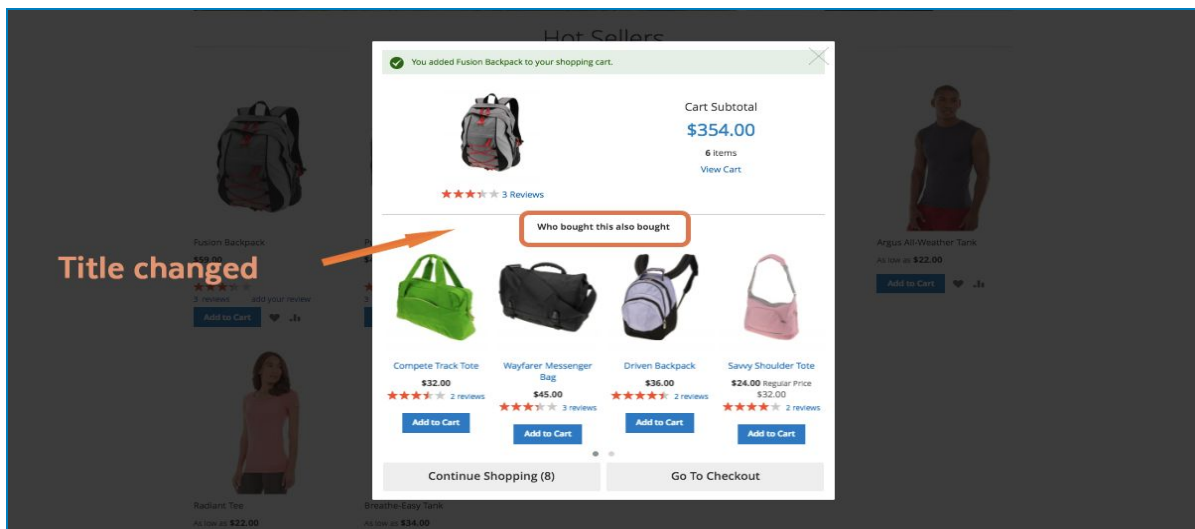

5. Related products block title

Change the title of Related block to "Who bought this also bought"

Let's see the result

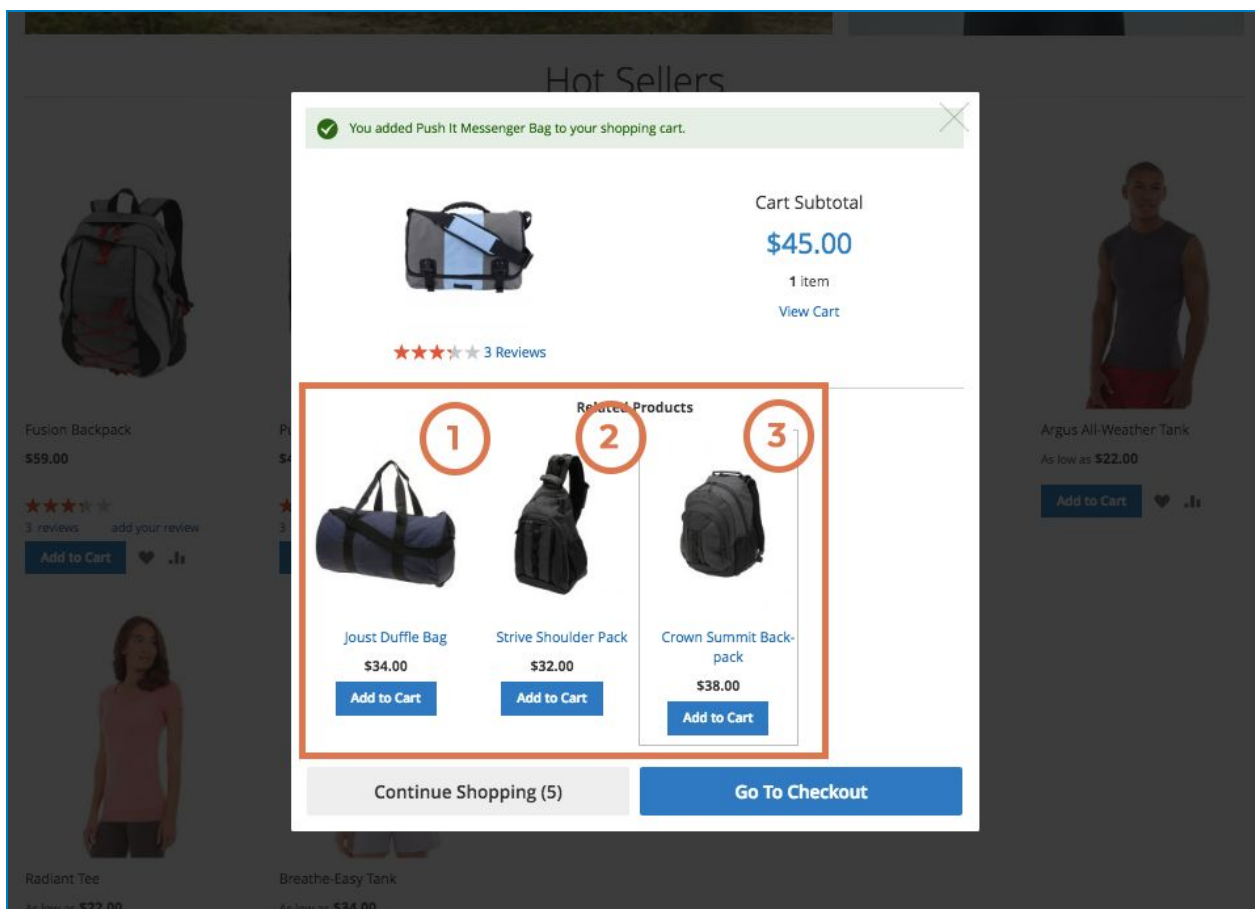

6. Number of Products

This field lets you set the number of products shown in front page. This case we set it to 3

Number of Products <small>[store view]</small>	<input type="text" value="3"/>
--	--------------------------------

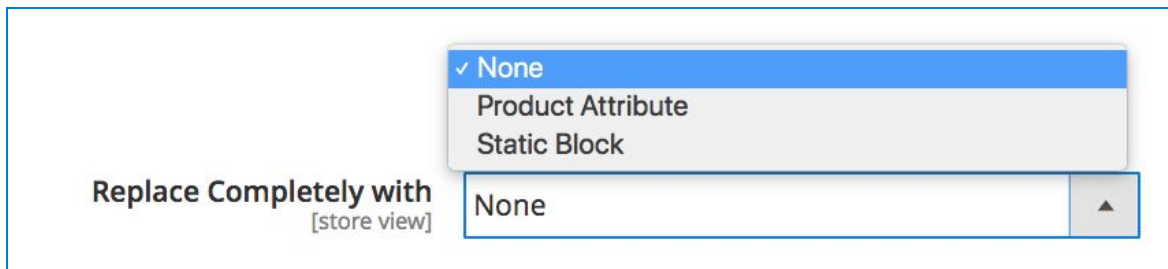

And it will be displayed like

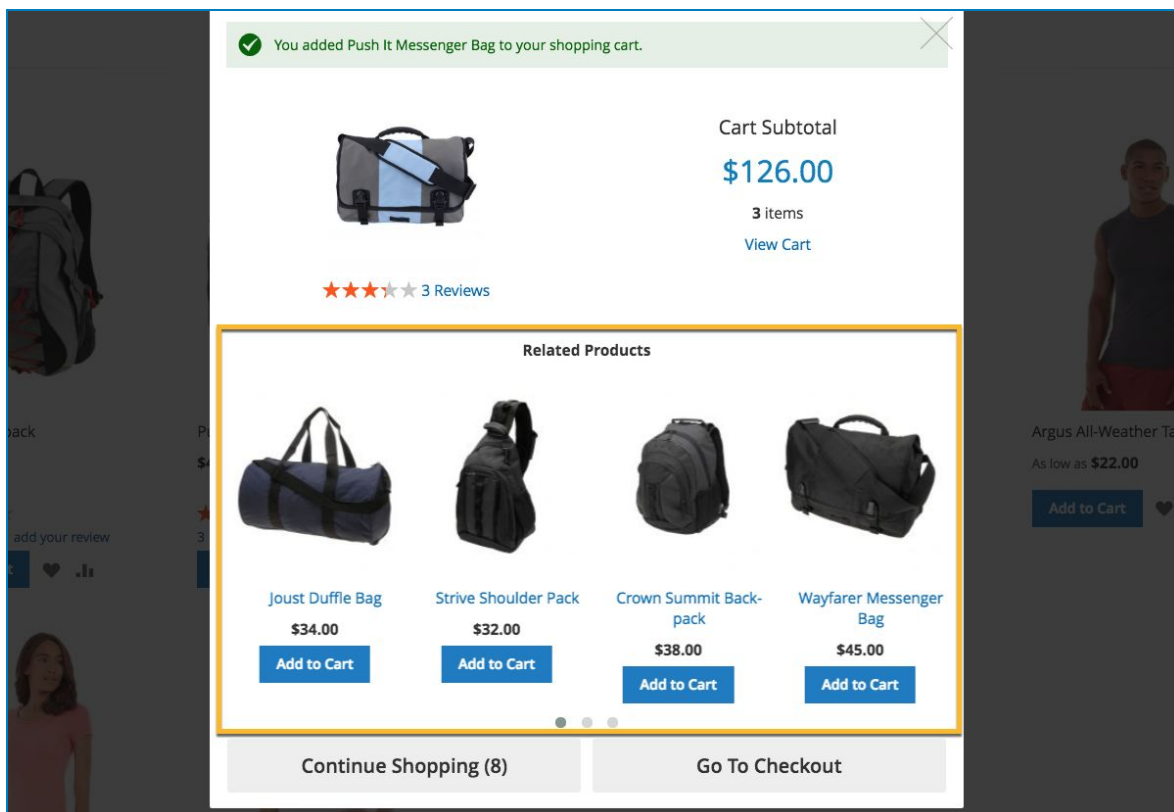

7. Replace Completely with

If you choose "Related products" in the field "Display Related Products", there will appear one more field below named "Replace Completely with". This field allow you to do some following functions:

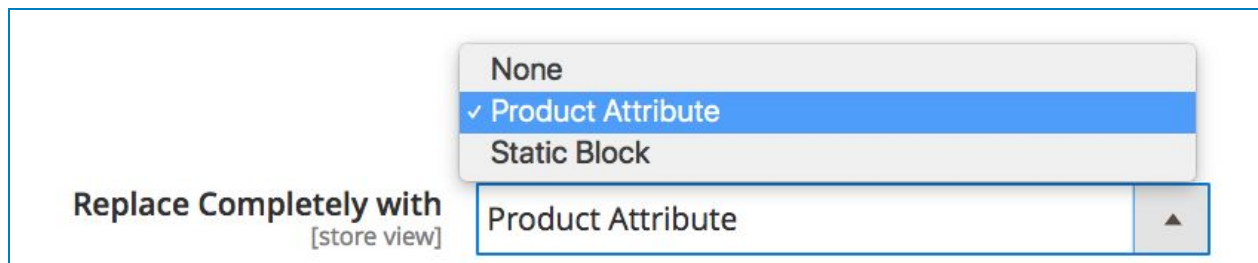

- First. If you choose "None"

So nothing will happen. Your block of related products keeps remaining at the same place and same name.

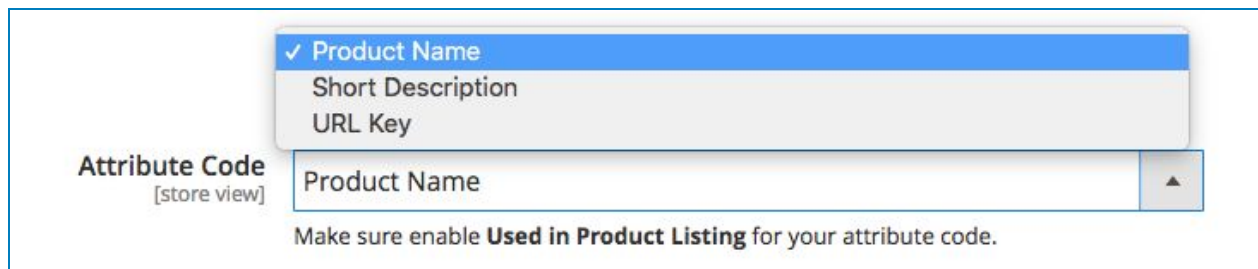

- Then, if you choose "Product Attribute"

The screenshot shows a dropdown menu for the field "Replace Completely with [store view]". The menu is open, displaying three options: "None", "Product Attribute" (which is selected and highlighted in blue), and "Static Block". Below the menu, the text "Product Attribute" is visible in the input field.

There will appear another field right below the previous one, named "Attribute Code" with options to choose. These options will vary depends on each website.

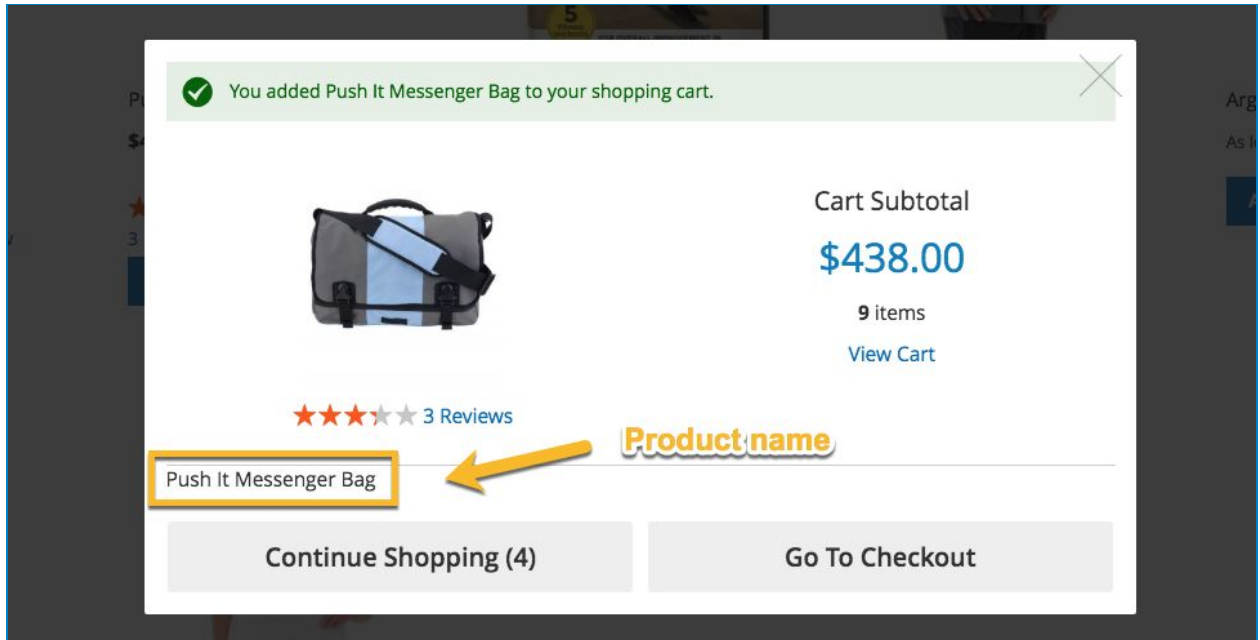

The screenshot shows a dropdown menu for the field "Attribute Code [store view]". The menu is open, displaying three options: "Product Name" (which is selected and highlighted in blue), "Short Description", and "URL Key". Below the menu, the text "Product Name" is visible in the input field. Below the input field, there is a note: "Make sure enable **Used in Product Listing** for your attribute code."

First, be sure **all the Attribute codes are enable** on Product Listing.

Then, decide which Attribute to add to the popup cause it will effect on customer's feeling and experience.

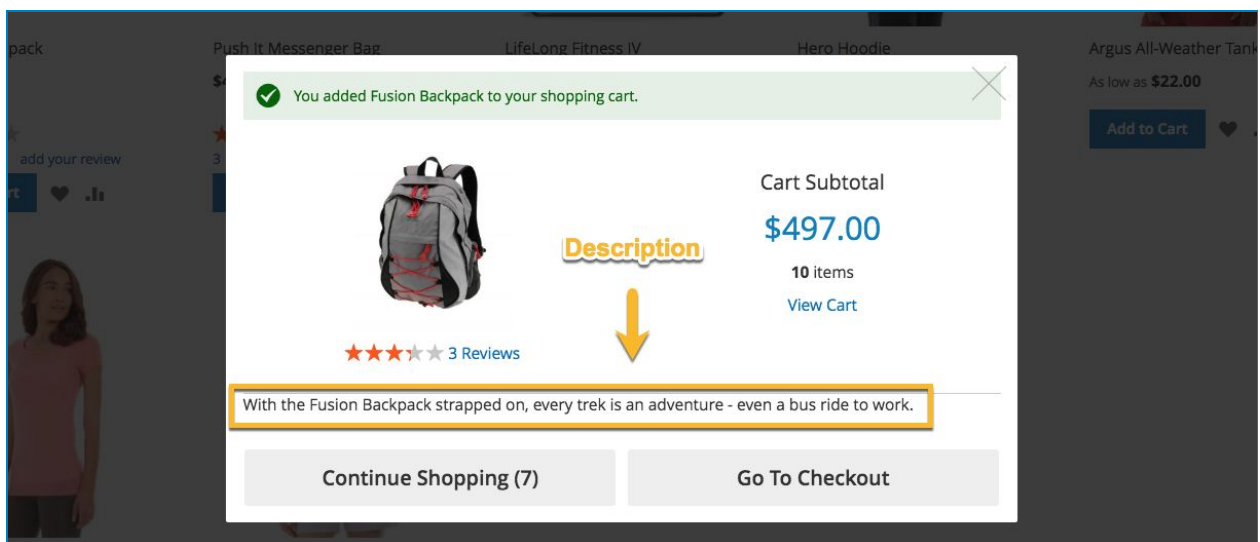

Now, let's see how they look in storefront:

+ Product Name

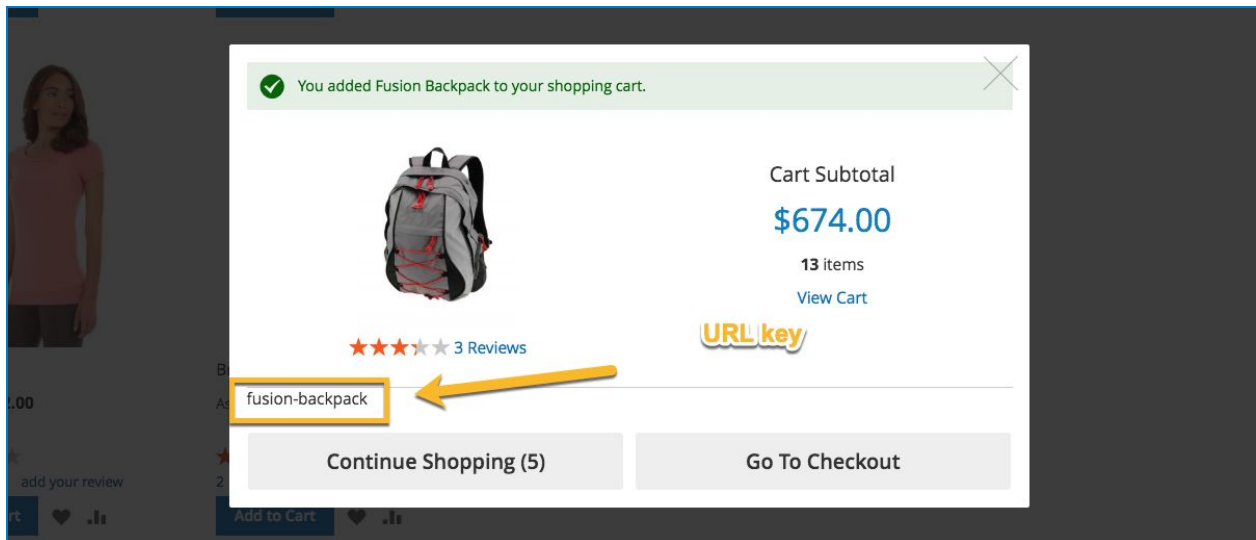

A screenshot of a storefront notification for the 'Push It Messenger Bag'. At the top, a green banner with a checkmark icon says 'You added Push It Messenger Bag to your shopping cart.' Below this, on the left, is an image of a grey and blue messenger bag. To the right of the image, the text reads 'Cart Subtotal \$438.00', '9 items', and a 'View Cart' link. Below the image is a 3-star rating with the text '3 Reviews'. The product name 'Push It Messenger Bag' is highlighted with a yellow box, and a yellow arrow points to it from the label 'Product name' above. At the bottom, there are two buttons: 'Continue Shopping (4)' and 'Go To Checkout'.

+ Short Description

A screenshot of a storefront notification for the 'Fusion Backpack'. At the top, a green banner with a checkmark icon says 'You added Fusion Backpack to your shopping cart.' Below this, on the left, is an image of a grey backpack. To the right of the image, the text reads 'Cart Subtotal \$497.00', '10 items', and a 'View Cart' link. Below the image is a 3-star rating with the text '3 Reviews'. The short description 'With the Fusion Backpack strapped on, every trek is an adventure - even a bus ride to work.' is highlighted with a yellow box, and a yellow arrow points to it from the label 'Description' above. At the bottom, there are two buttons: 'Continue Shopping (7)' and 'Go To Checkout'.

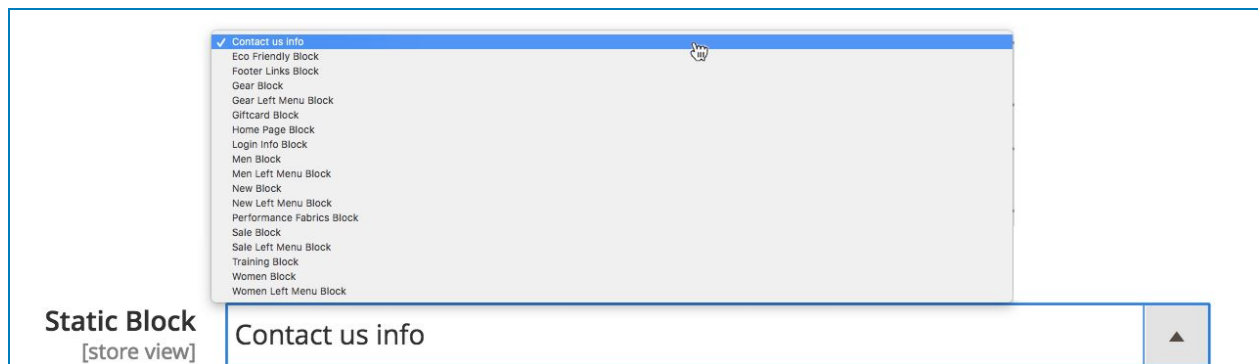

+ URL Key

- And last, if you choose **Static block** there will appear a respective field, as will be described below.

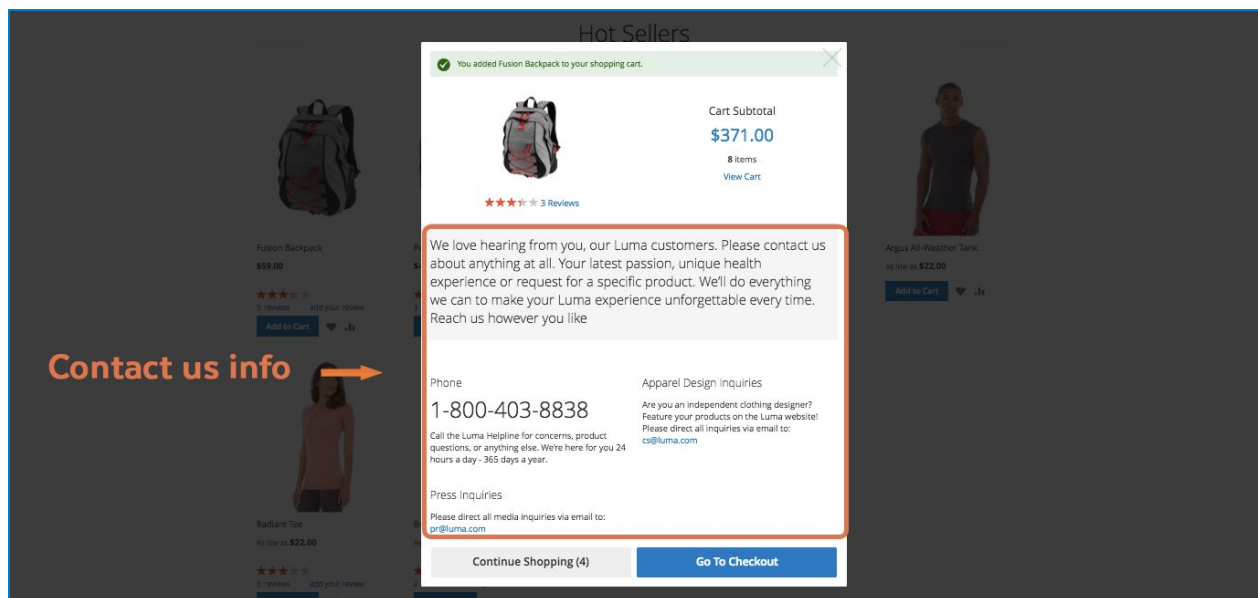

8. Static block

In this field, you get options of blocks to choose, depends on the structure of your website. Choose 1 block that fits your style most to add to the bottom of the popup window.

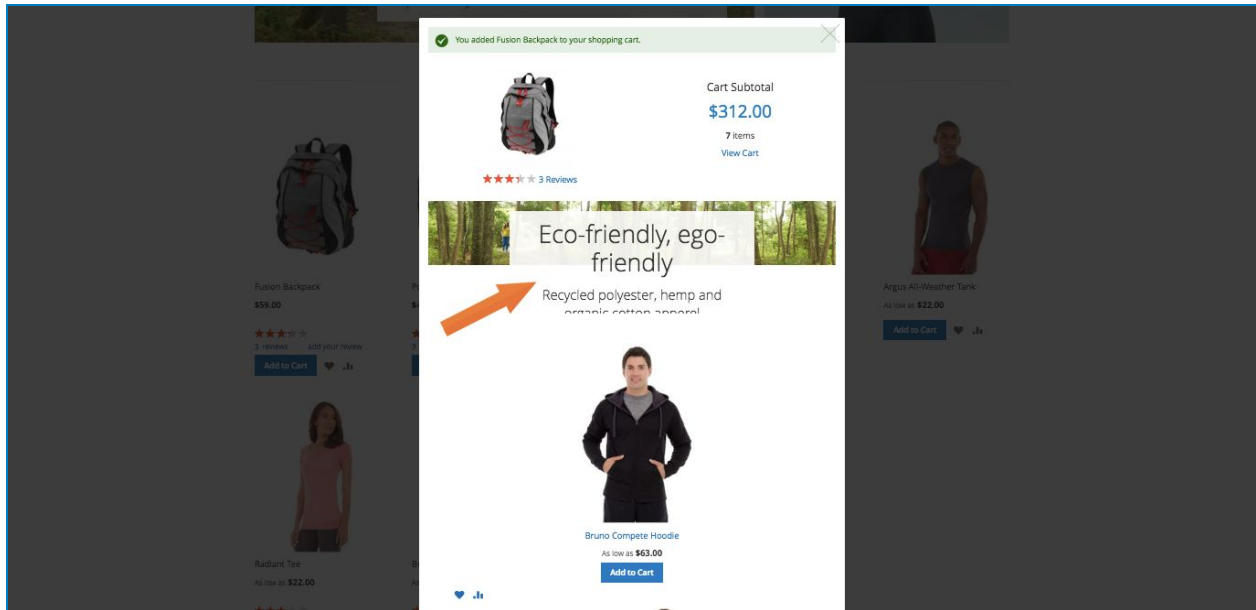

Here below are results in storefront of all 18 kinds of blocks:

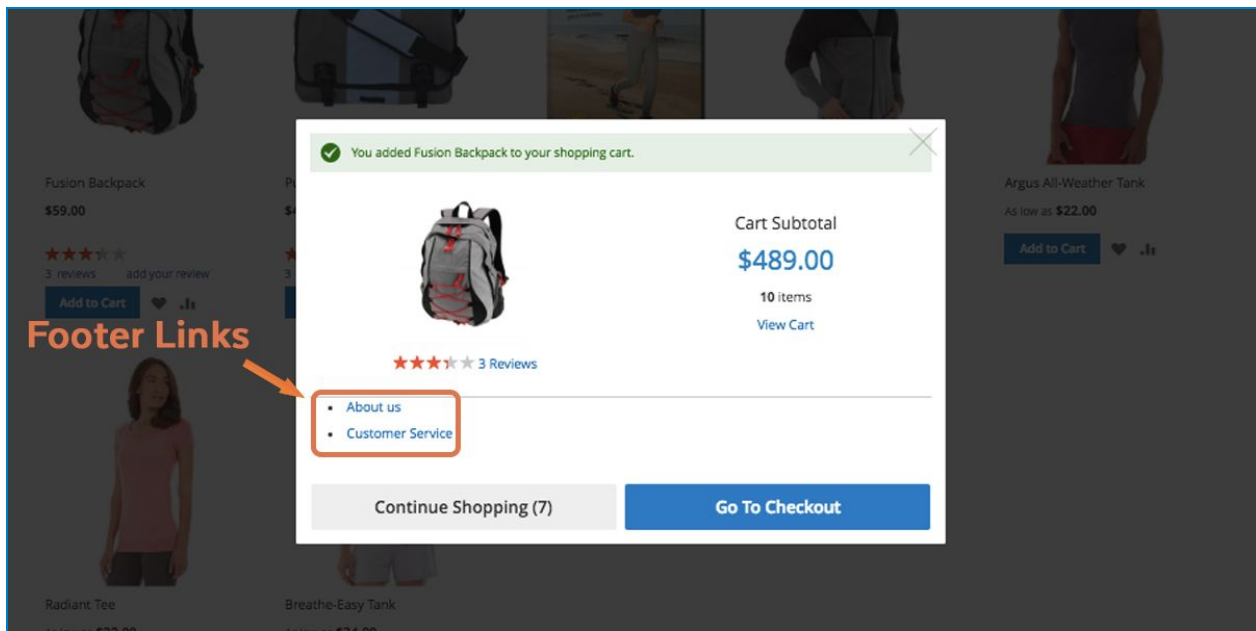

- Contact us info

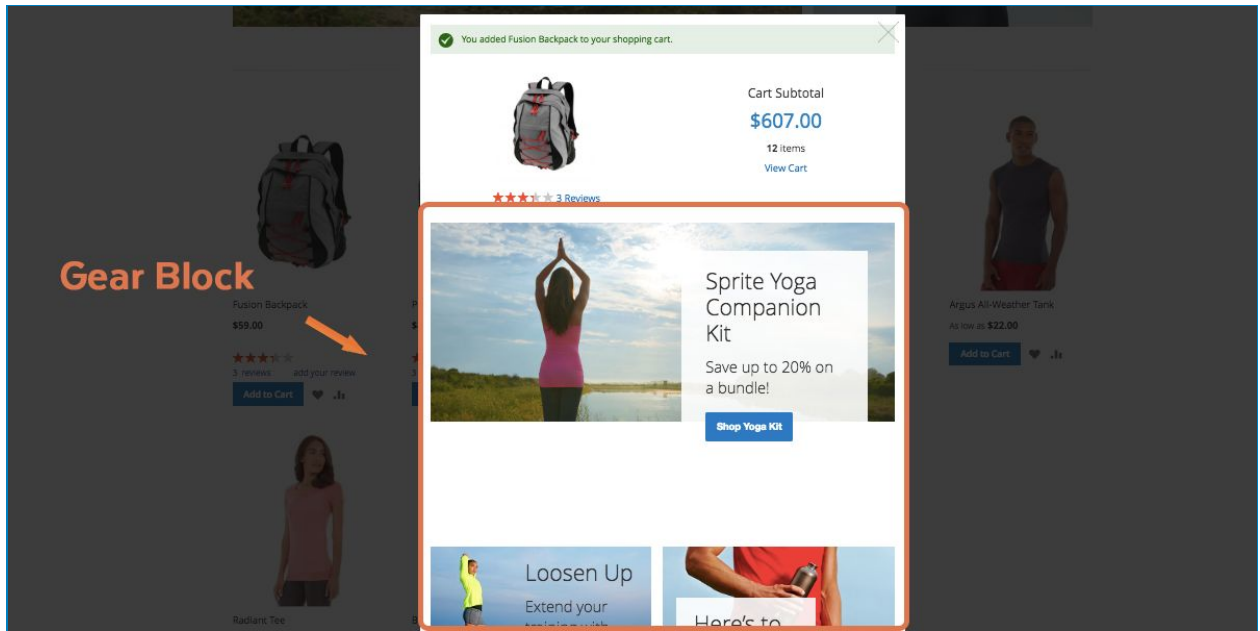

- Eco Friendly Block

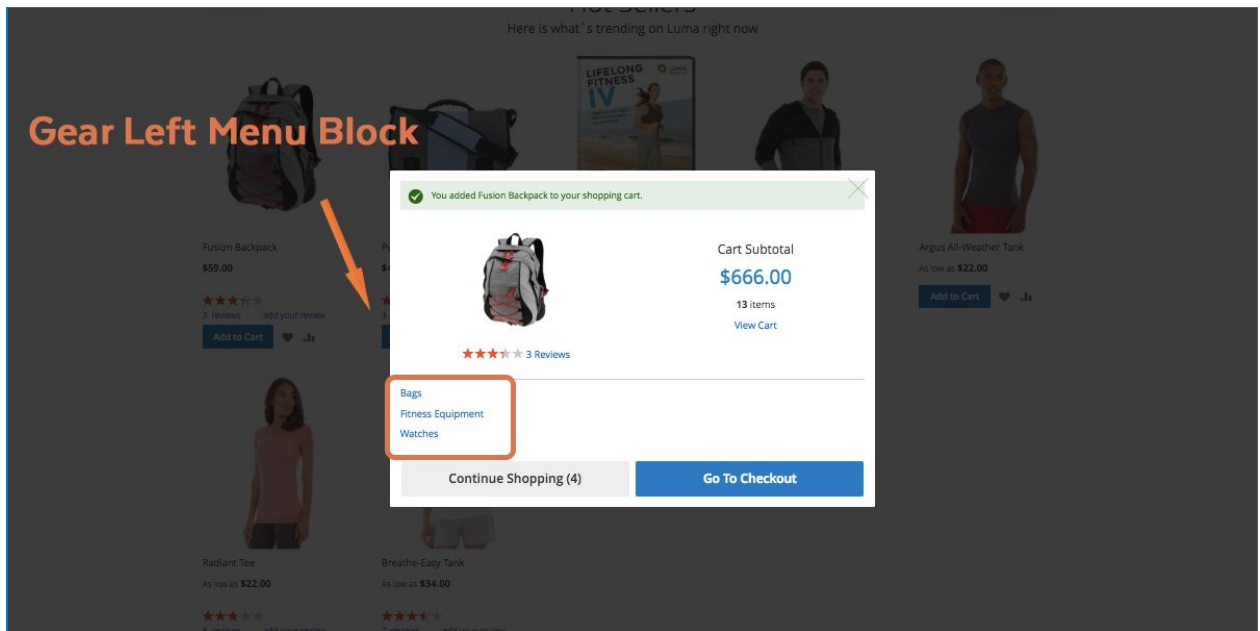

- Footer Links Block

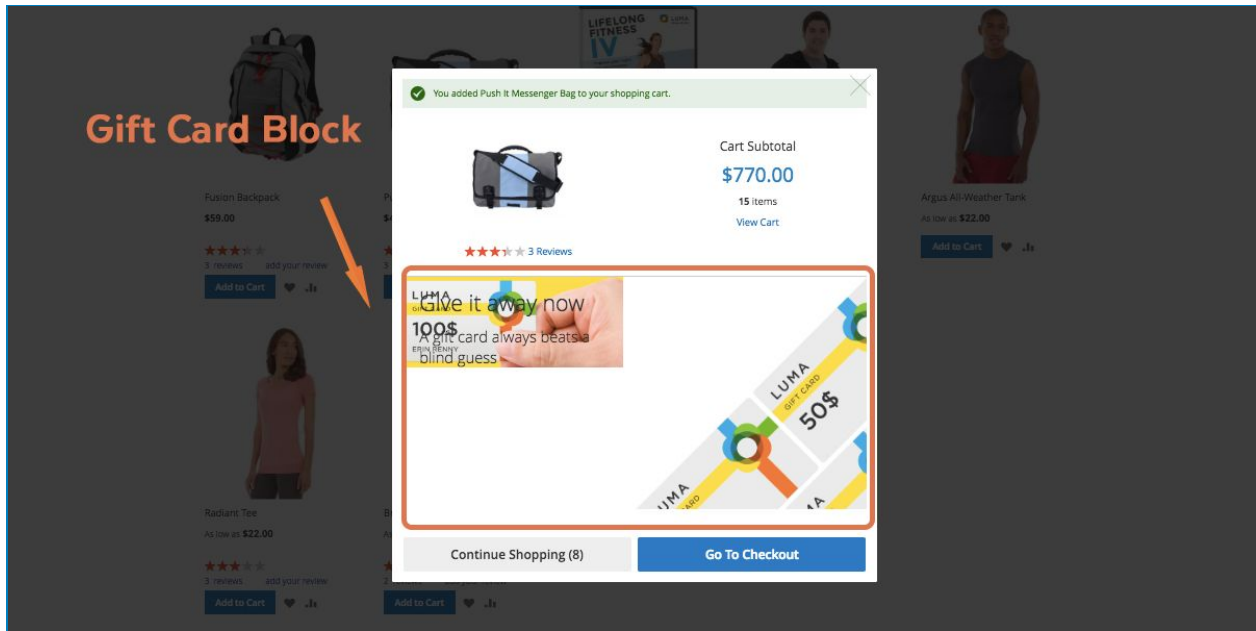

- Gear Block

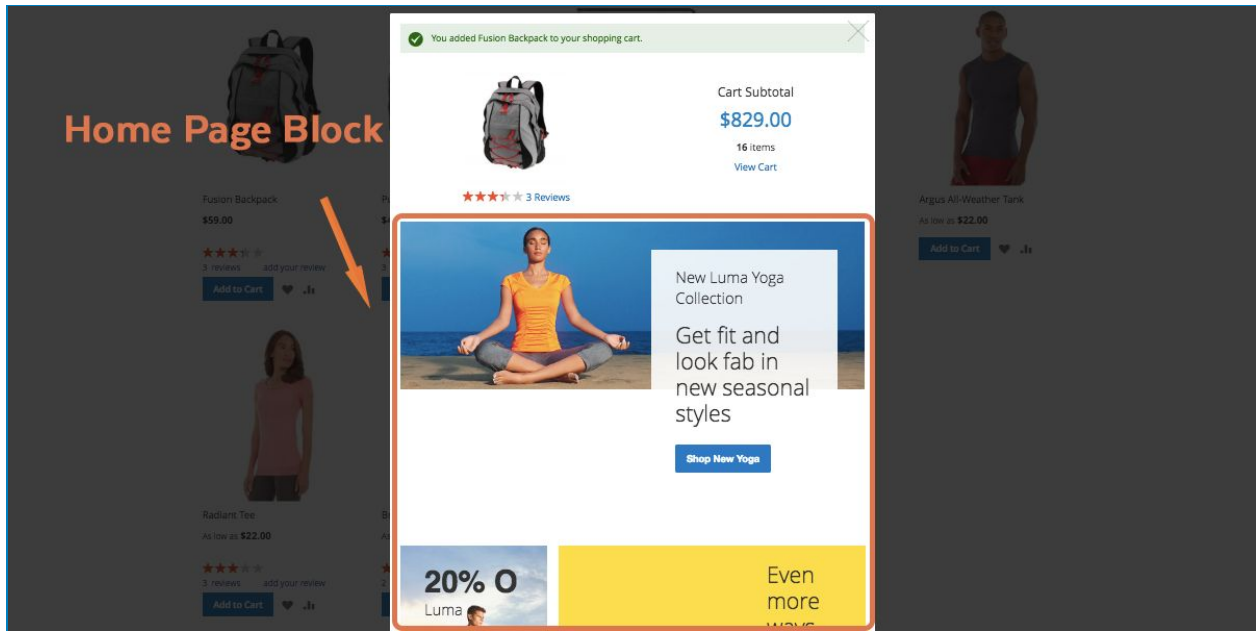

- Gear Left Menu Block

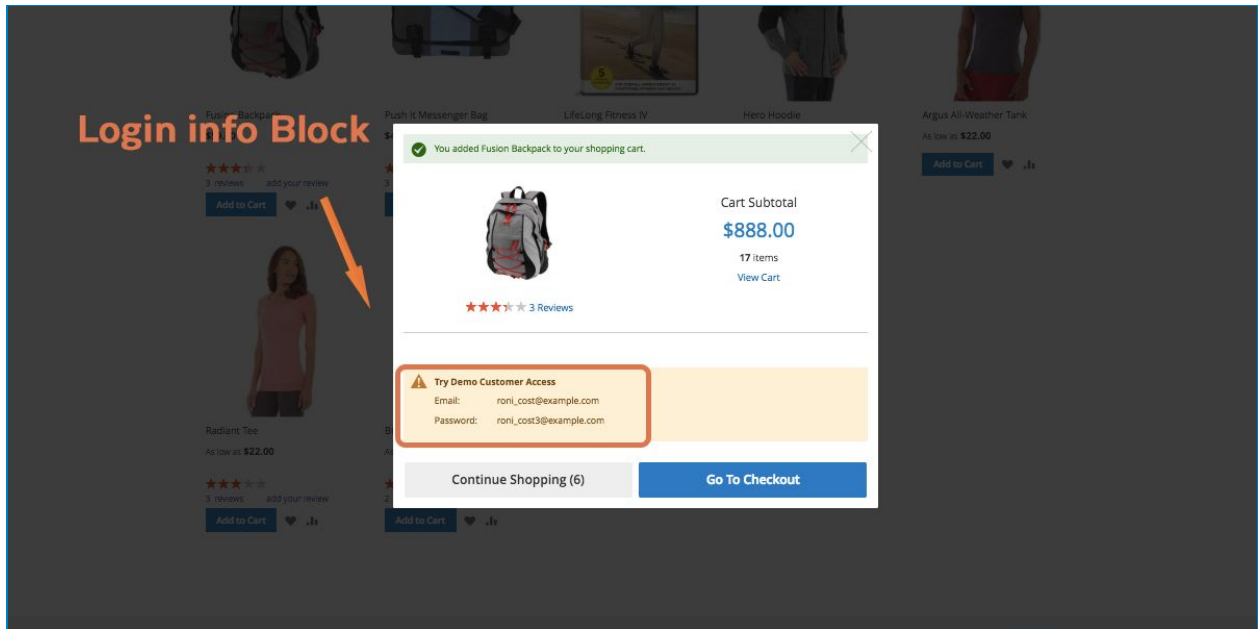

- Giftcard Block

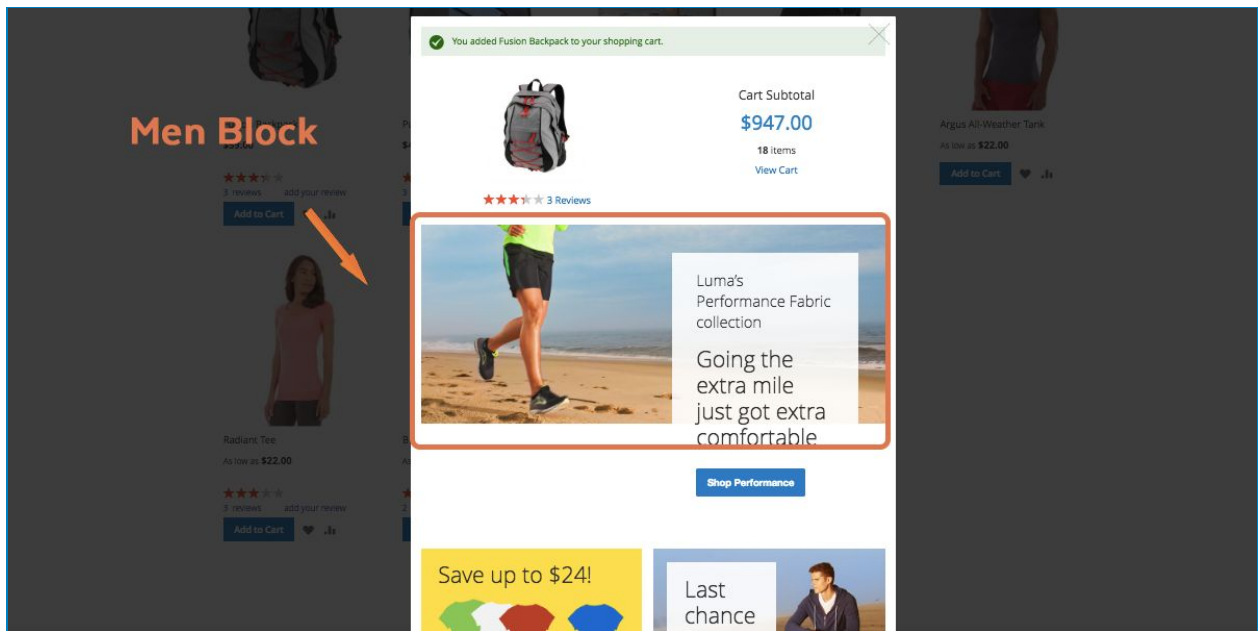

- Home Page Block

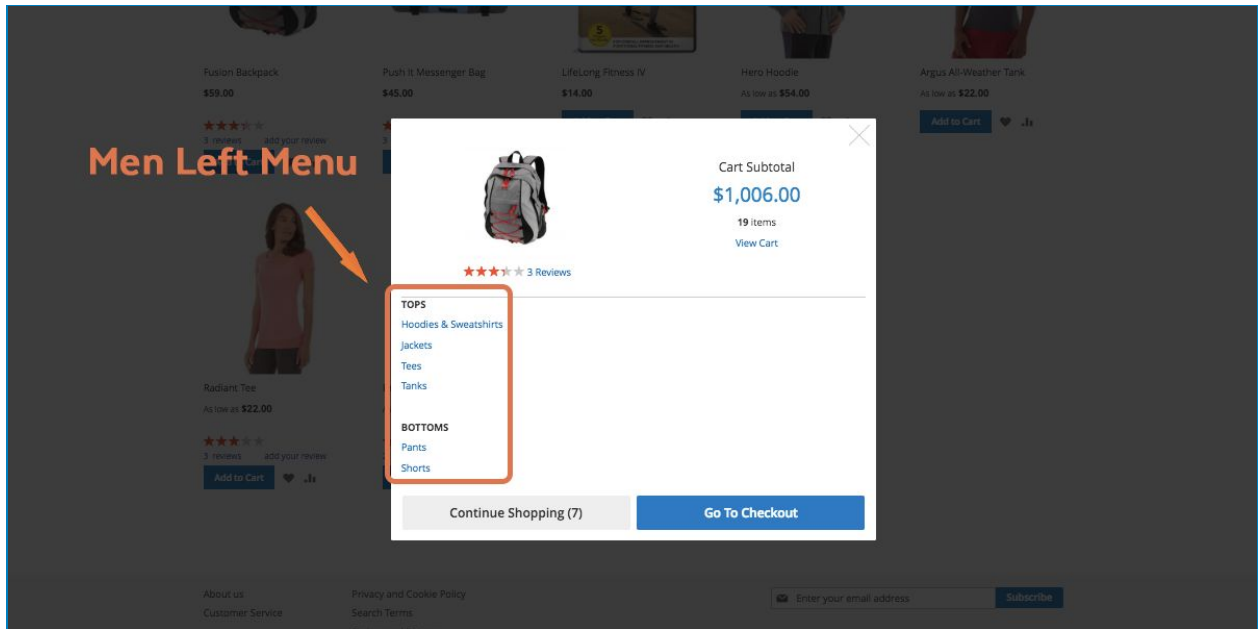

- Login info Block

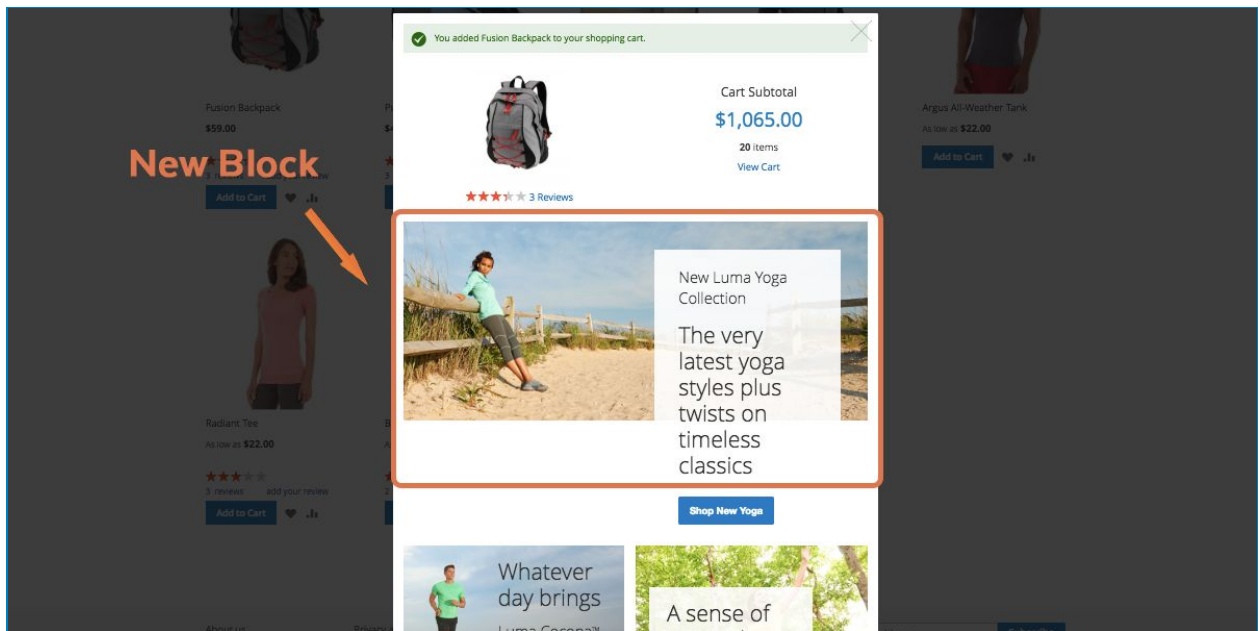

- Men Block

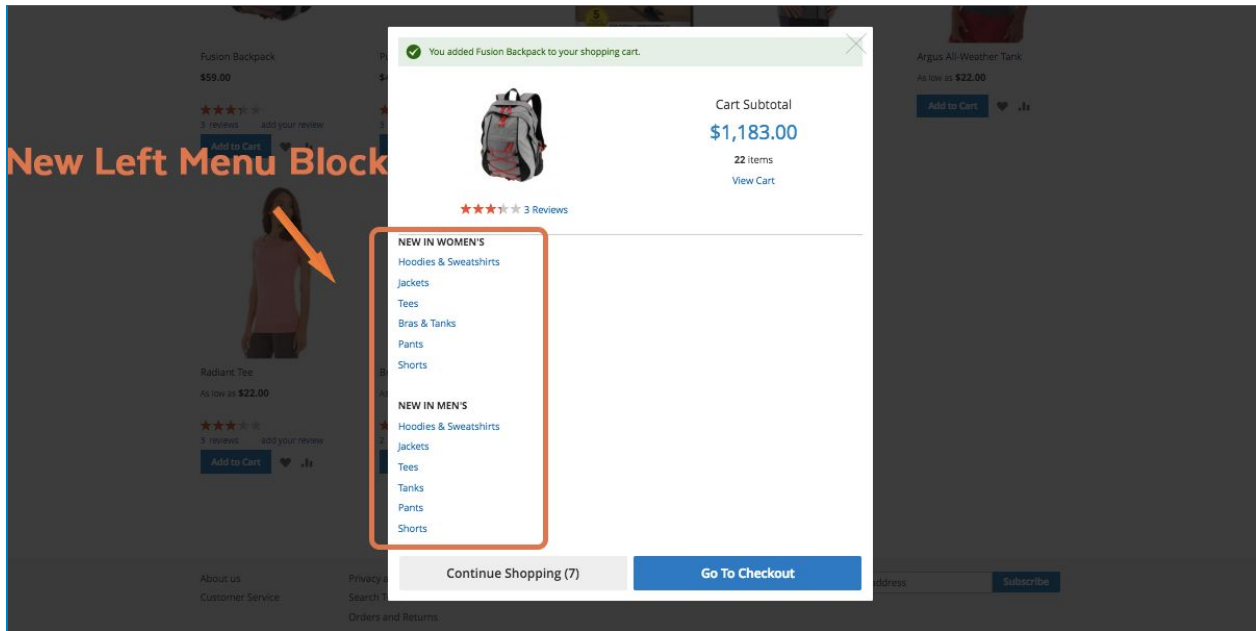

- Men Left Menu Block

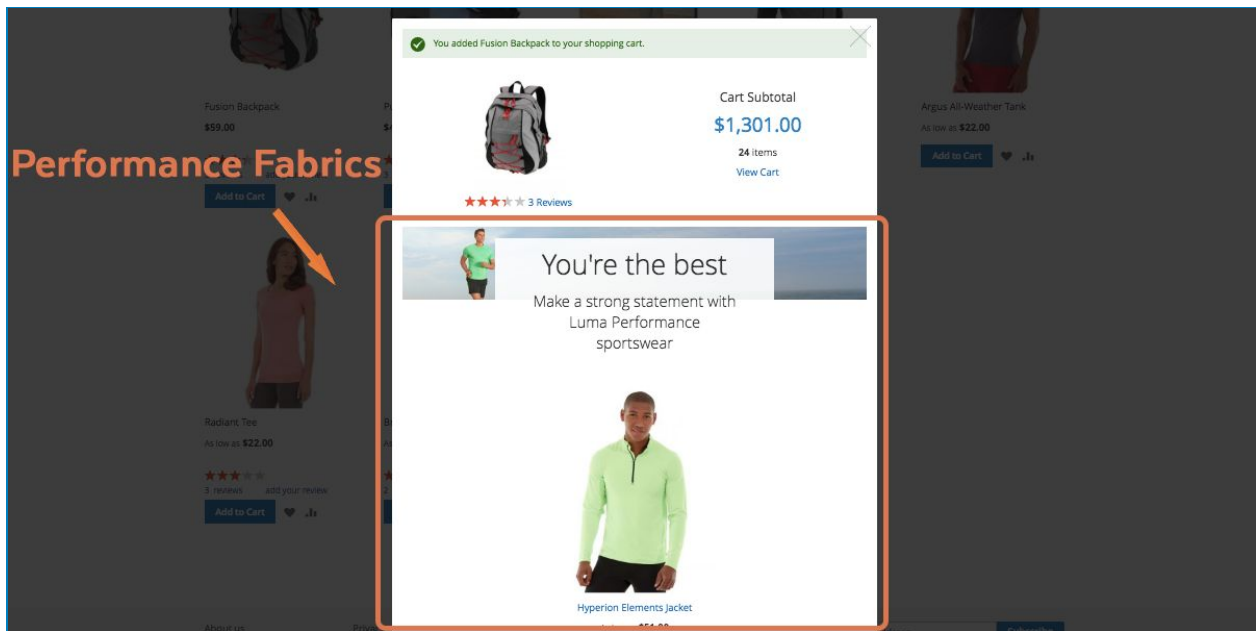

- New Block

IV) Design Settings

1. General Design Settings

The Design Settings makes it easy to customize and apply a theme on your website.

Setting in general includes **Popup Width** and **Color of background, price, link and link hover**. This case we make the general display to be:

Design Settings

Popup Width(px) <small>[store view]</small>	<input type="text" value="1000"/>	<input type="checkbox"/> Use system value
Background Color <small>[store view]</small>	<input type="text" value="#59ebae"/>	<input type="checkbox"/> Use system value
Price Color <small>[store view]</small>	<input type="text" value="#bf0020"/>	<input type="checkbox"/> Use system value
Link Color <small>[store view]</small>	<input type="text" value="#0012b5"/>	<input type="checkbox"/> Use system value
Link Hover Color <small>[store view]</small>	<input type="text" value="#cfc03c"/>	<input type="checkbox"/> Use system value

And here's how it look in the storefront:

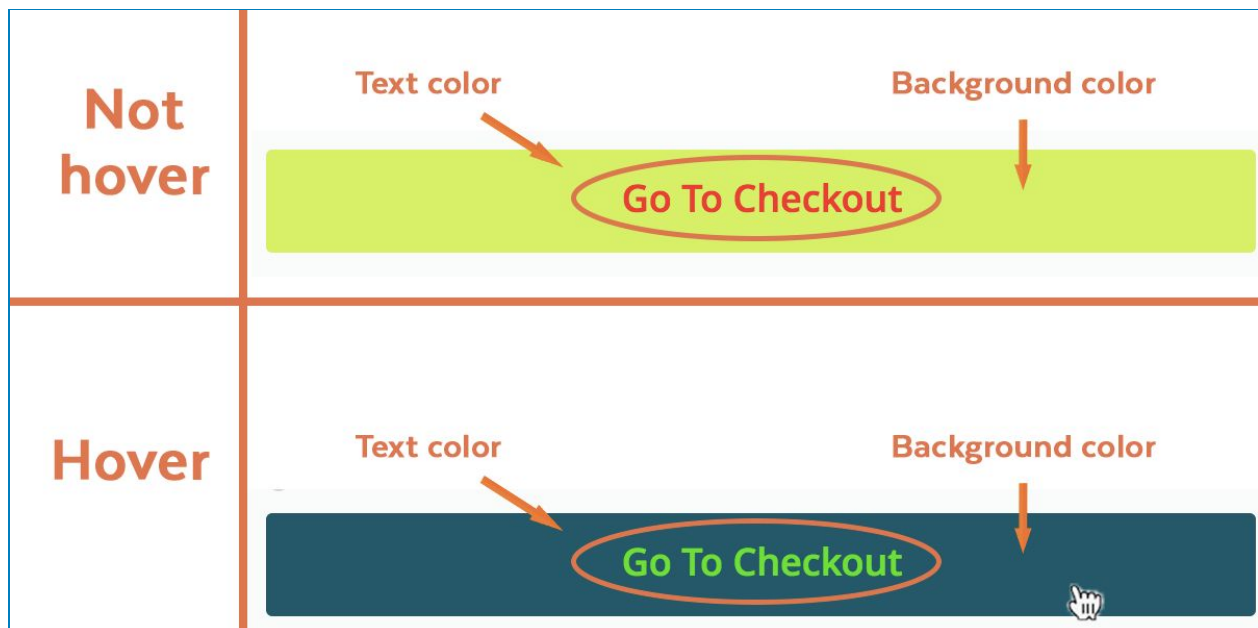

2. Go to Checkout Button setting

Let's set some colors for our Checkout button. You just have to pick a random color or your favourite colors to decorate the button. Like this:

Go to Checkout Button

Color <small>[store view]</small>	<input style="width: 95%;" type="text" value="#ed1114"/>	<input type="checkbox"/> Use system value
Hover Color <small>[store view]</small>	<input style="width: 95%;" type="text" value="#2fde2c"/>	<input type="checkbox"/> Use system value
Background Color <small>[store view]</small>	<input style="width: 95%;" type="text" value="#d7f068"/>	<input type="checkbox"/> Use system value
Hover Background Color <small>[store view]</small>	<input style="width: 95%;" type="text" value="#145969"/>	<input type="checkbox"/> Use system value

And the result:

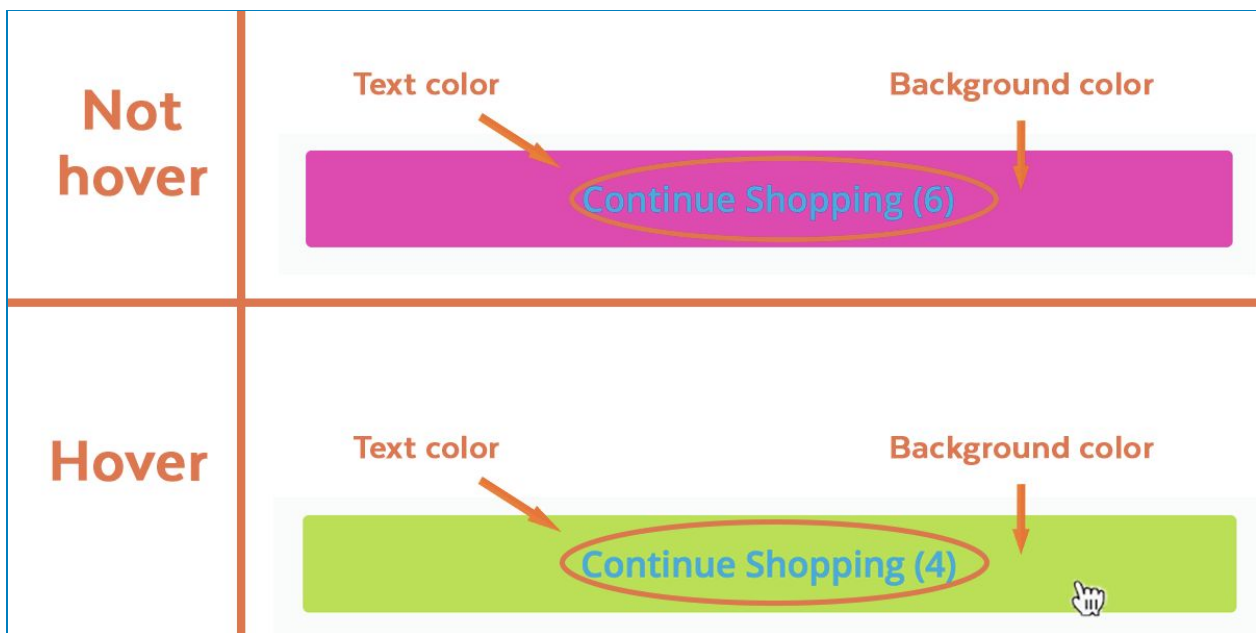

3. Continue Shopping Button Setting

Design the Continue Shopping Button your way.

Continue Shopping Button			
Color <small>[store view]</small>	<input type="text" value="#39aadb"/>	<input type="checkbox"/>	Use system value
Hover Color <small>[store view]</small>	<input type="text" value="#198726"/>	<input type="checkbox"/>	Use system value
Background Color <small>[store view]</small>	<input type="text" value="#db1faf"/>	<input type="checkbox"/>	Use system value
Hover Background Color <small>[store view]</small>	<input type="text" value="#bbe057"/>	<input type="checkbox"/>	Use system value

And wait to see how it looks...

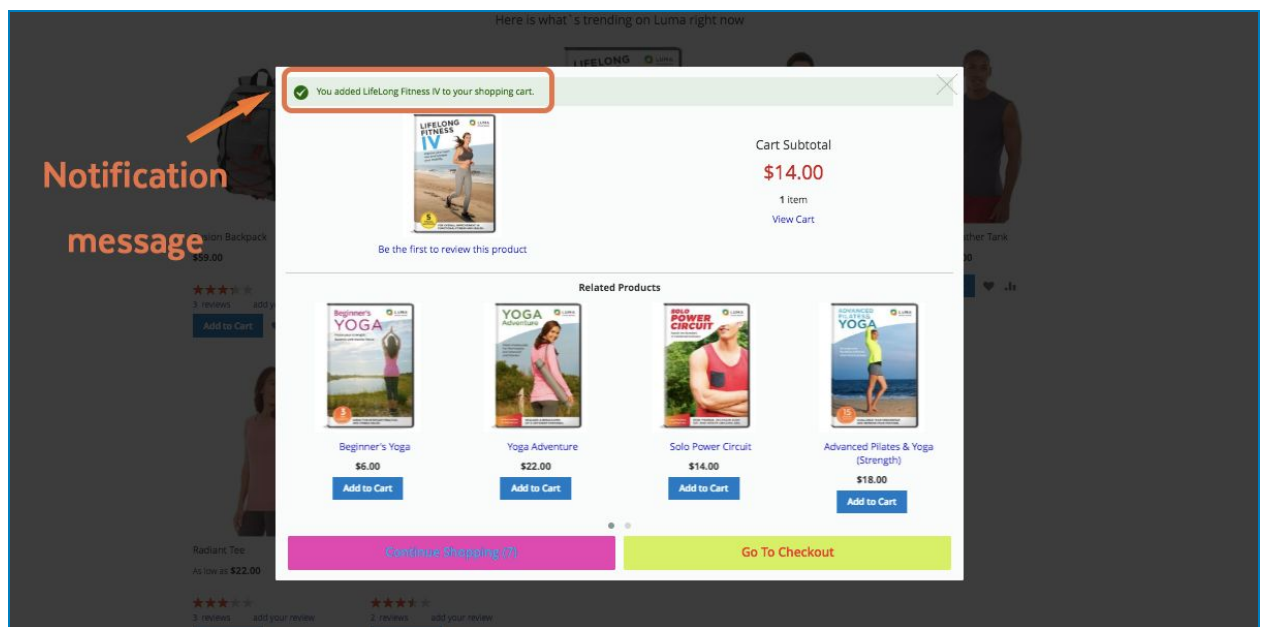

V) How to use in storefront

1. Simple Products

Currently, we separate products into 6 main types:

- If a product has no option (such as the color, size, quantity...) or we usually call them Simple ones, the Ajax loading popup will appear to inform that the product is added to cart successfully.

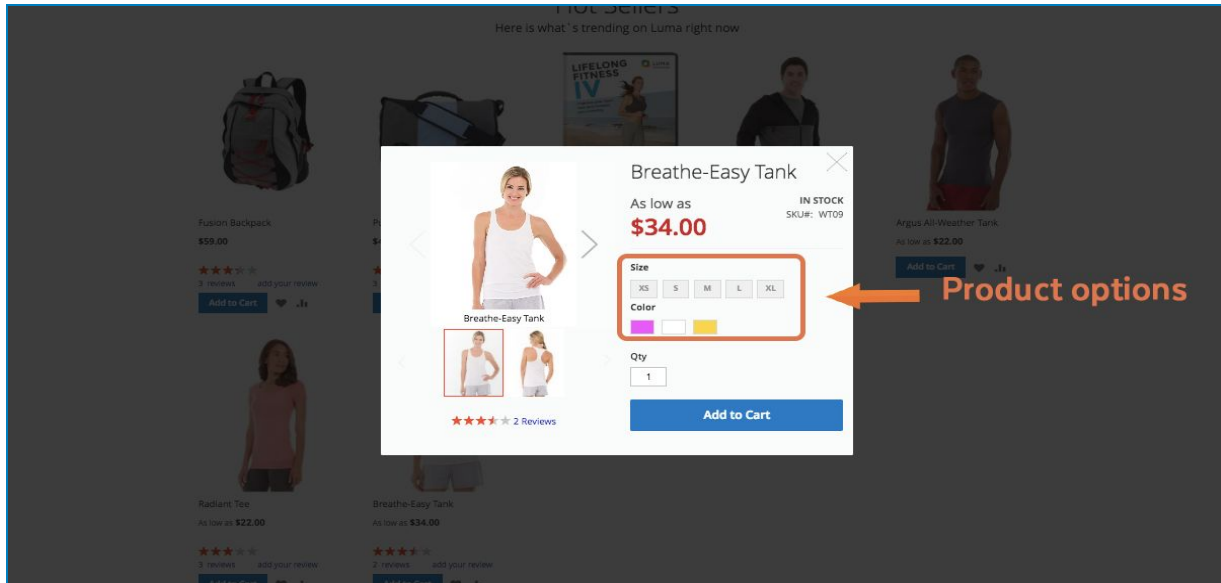

Like this:

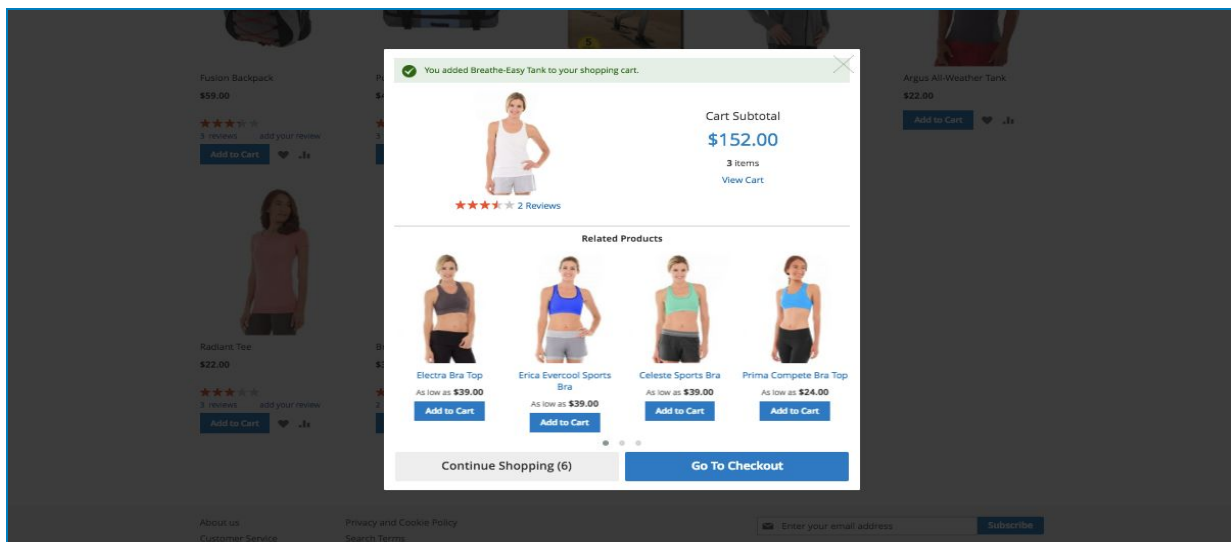

Click on **Go to Checkout Button** to go to Checkout page and continue the next shopping process. Or wait for the popup to close automatically in the time set to add more items from current page to cart.

2. Configurable Products

- If the product has custom options to select, the Ajax loading cart will be displayed as below:

Customers have to choose the options to make the last decision in order to add the exact item to cart. After clicking on **Add to Cart** button, they will see something like this:

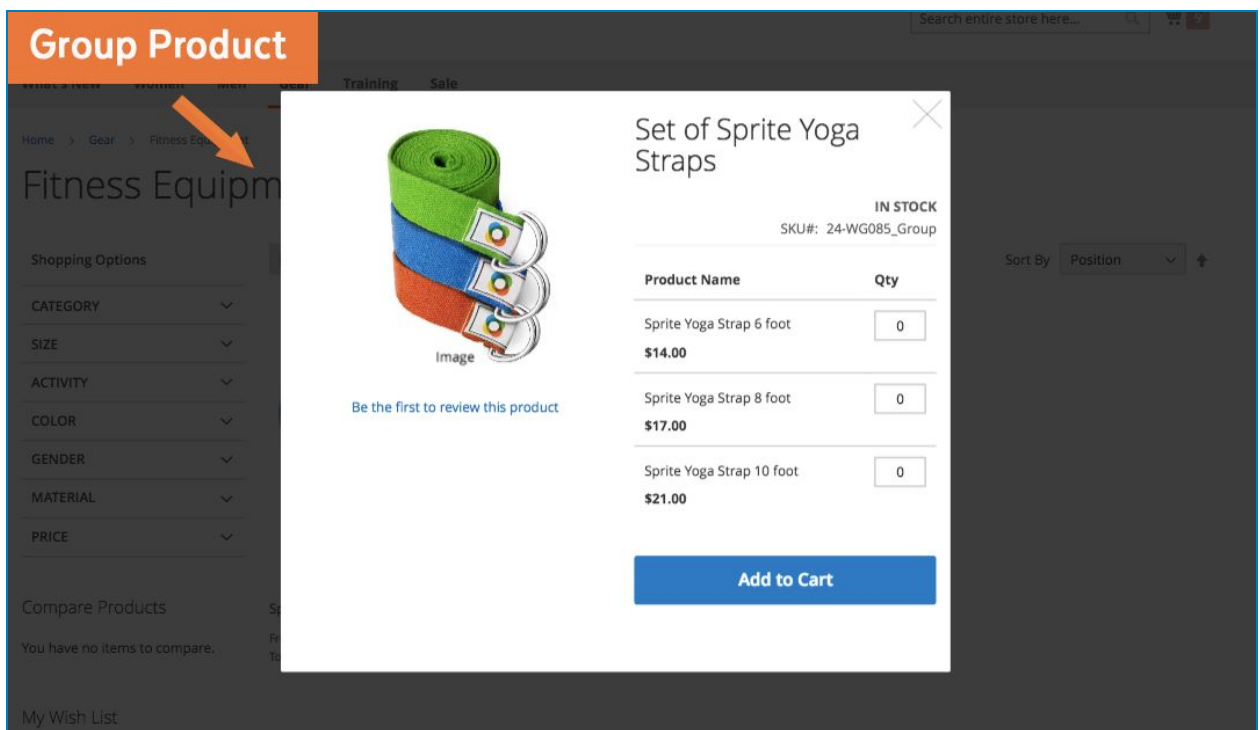

Then, customers can choose to continue shopping or checkout.

3. Grouped Products

This kind of product is a group of simple ones. The add to cart button in this case still remains its function as usual.

All the thing you have to do is just enter the number (Quantity) of each single product in group.

Then click **Add to cart** and wait for the next step.

The screenshot shows a product page for 'Set of Sprite Yoga Straps' with a modal window open. The modal displays the product image, a 'Be the first to review this product' message, and a table of product options with their respective prices and quantities. An orange arrow points to the 'Group Product' label in the top left corner of the modal.

Product Name	Qty
Sprite Yoga Strap 6 foot \$14.00	<input type="text" value="0"/>
Sprite Yoga Strap 8 foot \$17.00	<input type="text" value="0"/>
Sprite Yoga Strap 10 foot \$21.00	<input type="text" value="0"/>

Below the table is a blue 'Add to Cart' button.

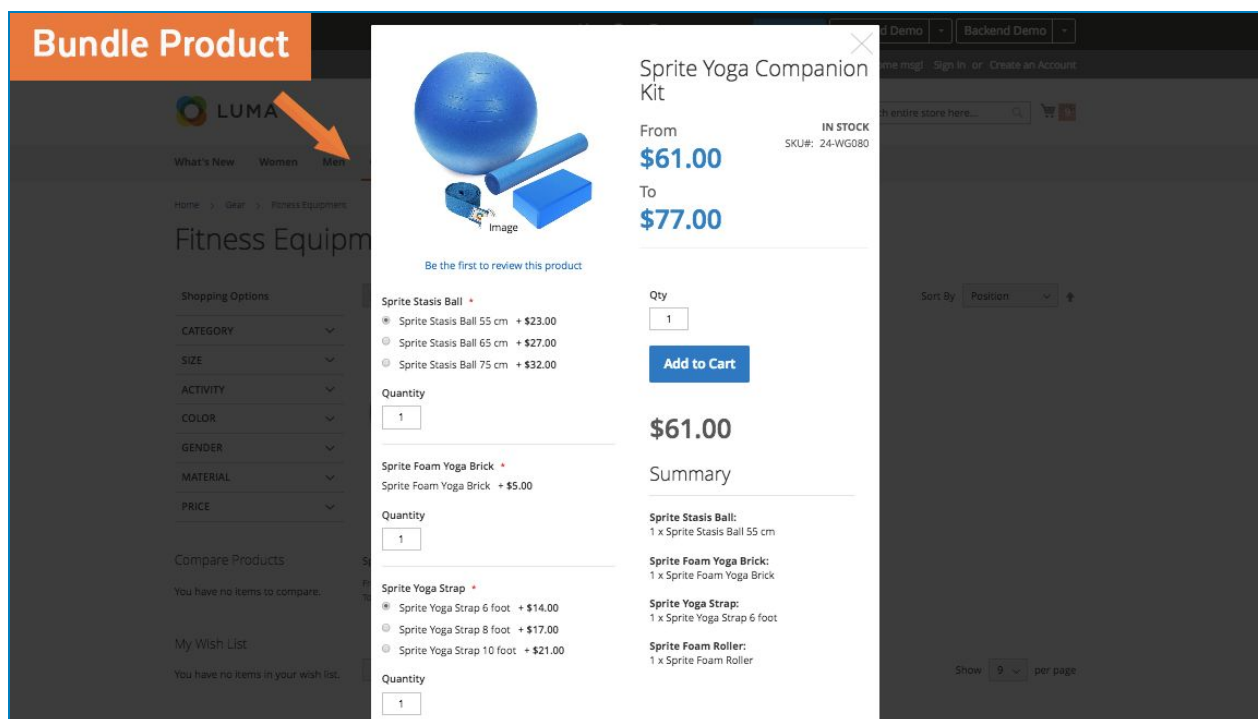

4. Bundle Products

This is the most complicated kind of product. It is the combination of Group and configurable ones. In other words, it's exactly a group of relatively configurable products.

First, you have chose the options inside each product

Then, decide the quantity of them

Last, click on the buying button.

The screenshot shows a product page for a 'Bundle Product' titled 'Sprite Yoga Companion Kit'. The page is divided into several sections:

- Product Image:** A blue stasis ball, a blue foam roller, and a blue yoga strap are shown. Below the image is the text 'Be the first to review this product'.
- Product Name and Price:** The product is named 'Sprite Yoga Companion Kit' and is 'IN STOCK' with SKU# 24-WG080. The price is shown as 'From \$61.00 To \$77.00'.
- Quantity:** A quantity selector is set to '1'.
- Add to Cart:** A blue 'Add to Cart' button is visible.
- Summary:** A summary section lists the items in the bundle:
 - Sprite Stasis Ball:** 1 x Sprite Stasis Ball 55 cm
 - Sprite Foam Yoga Brick:** 1 x Sprite Foam Yoga Brick
 - Sprite Yoga Strap:** 1 x Sprite Yoga Strap 6 foot
 - Sprite Foam Roller:** 1 x Sprite Foam Roller
- Configurable Options:**
 - Sprite Stasis Ball:** Three radio button options are shown: '55 cm' (+\$23.00), '65 cm' (+\$27.00), and '75 cm' (+\$32.00). The '55 cm' option is selected.
 - Sprite Foam Yoga Brick:** One radio button option is shown: 'Sprite Foam Yoga Brick' (+\$5.00), which is selected.
 - Sprite Yoga Strap:** Three radio button options are shown: '6 foot' (+\$14.00), '8 foot' (+\$17.00), and '10 foot' (+\$21.00). The '6 foot' option is selected.
- Quantity:** A quantity selector is set to '1' for the bundle.

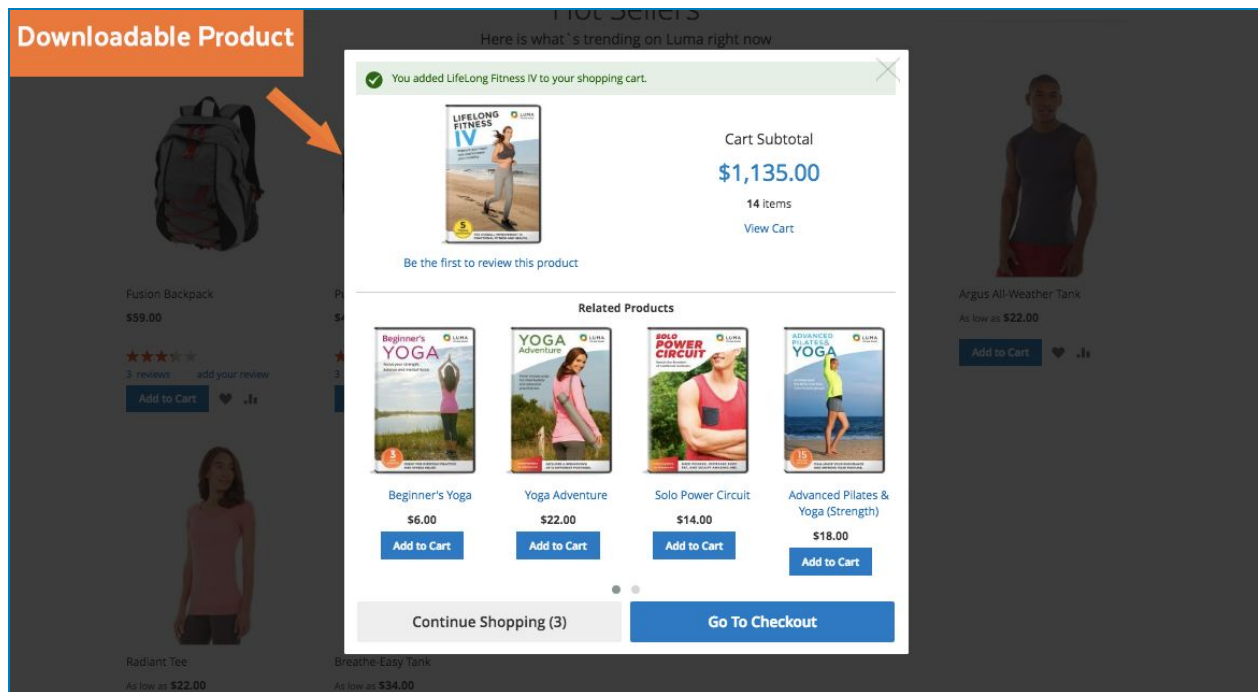

The background shows a dark-themed Magento 2 storefront with a navigation menu on the left and a search bar at the top. An orange arrow points to the 'Bundle Product' header.

5. Downloadable Products

This product somehow is the same to simple product. But the main feature of it is that it can be downloaded. It can be a software, ebook, online news, magazine, etc.

If they have no custom option, you do it as simple ones

If they do, take the process of configurable ones.

Downloadable Product

You added Lifelong Fitness IV to your shopping cart.

Cart Subtotal: **\$1,135.00**

6. Virtual Products

Totally the same simple product.

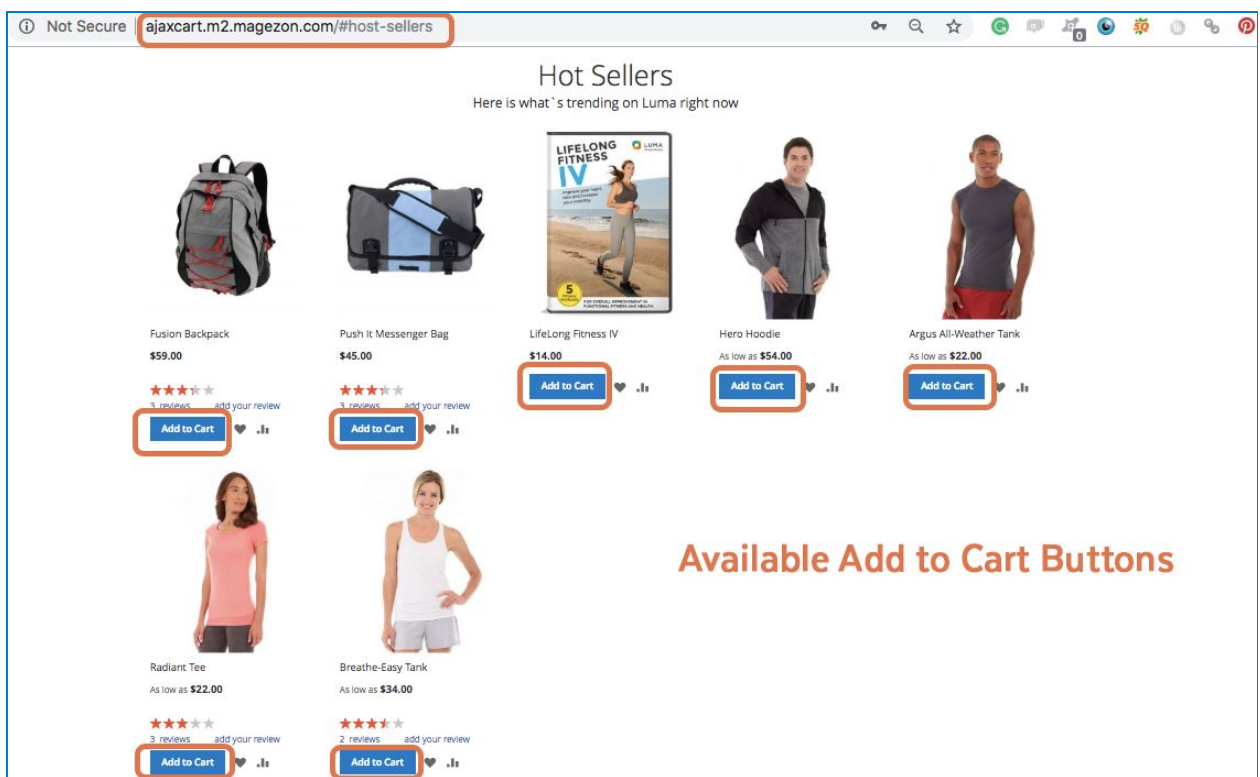

To buy this kind of product, click on the button - the easiest way to buy something.

VI - Ajax Cart on different pages

1. Home page - Hot sellers

Ajax Cart can appear even on the homepage as long as the Add to Cart button is available.

The screenshot shows a browser window with the URL `ajaxcart.m2.magezon.com/#host-sellers`. The page title is "Hot Sellers" with the subtitle "Here is what's trending on Luma right now". It displays seven product cards:

- Fusion Backpack**: \$59.00, 3 reviews, "Add to Cart" button highlighted.
- Push It Messenger Bag**: \$45.00, 3 reviews, "Add to Cart" button highlighted.
- LifeLong Fitness IV**: \$14.00, 5 reviews, "Add to Cart" button highlighted.
- Hero Hoodie**: As low as \$54.00, "Add to Cart" button highlighted.
- Argus All-Weather Tank**: As low as \$22.00, "Add to Cart" button highlighted.
- Radiant Tee**: As low as \$22.00, 3 reviews, "Add to Cart" button highlighted.
- Breathe-Easy Tank**: As low as \$34.00, 2 reviews, "Add to Cart" button highlighted.

Each product card includes a star rating, a link to "add your review", a heart icon for wishlists, and a shopping cart icon. A large orange text overlay on the right side of the page reads "Available Add to Cart Buttons".
